Driving SDG Implementation Through Global Connections & Local Impact

Prof. Jeffrey Sachs, President of the SDSN

As the world deals with ever-increasing obstacles to sustainable development, including climate change impacts, global conflicts, economic fragmentation, chronic underfinancing, and societal polarization, the UN Sustainable Development Solutions Network (SDSN) is unwavering in its efforts to accelerate implementation of the Sustainable Development Goals (SDGs).

With its global network of over 2,200 member organizations from 160 countries, the SDSN is closely working with its partners to advance SDG progress. During the final four years of the 2030 Agenda, the 17 SDGs continue to serve as our universal blueprint for addressing poverty, inequality, climate change, and the long-term viability of our planet.

The SDSN Networks' advisory body, the Networks Strategy Council (NSC), supports with shaping the program's vision, expansion strategy, work plan, and fundraising strategies.

Strengthening National & Regional Action

Against a complex global setting, the SDSN is uniquely positioned to tackle the world's most pressing challenges with science-based solutions. In 2025, the SDSN Networks Program increased its global footprint by expanding to 60 national and regional Networks, welcoming the SDSN Netherlands, SDSN Egypt, and SDSN Kuwait. Together, these 60 Networks coordinate a wide-range of knowledge institutions, including universities, research centers, think tanks, NGOs, and policy organizations, translating global goals into locally-led solutions shaped by national and regional priorities.

"Our Global Network and national and regional Networks are the foundation of our impact. Universities play a critical role in driving transformative and practical solutions for the world's most acute challenges. Our dynamic Network will continue to enable locally-grounded solutions informed by global evidence. We aim to reach every UN Member State through our national and regional Networks, covering all 193 countries."

Prof. Jeffrey Sachs, President of the SDSN

This expansion was bolstered by the launch of the SDSN Africa Center in February 2025 at Addis Ababa University. The Center advances economic research, policy analysis, education, and green transition strategies, while supporting greater regional and global integration. It coordinates 12 national and regional SDSN Networks across more than 25 countries and territories, reinforcing Africa-led, evidence-based progress toward the SDGs. The SDSN Africa center also serves as an important regional hub for knowledge exchange, policy innovation, and strategic partnerships.

The SDSN Networks Program also continues to expand its presence in Central Asia. Under the tripartite agreement signed in November 2024 between the SDSN, Agence Française de Développement (French Development Agency), and the Ministry of Economy and Finance of the Republic of Uzbekistan, a key deliverable is the formal establishment of SDSN Uzbekistan. In the summer of 2026, the Institute for Macroeconomic and Regional Studies (IMRS) and the University of World Economy and Diplomacy (UWED) submitted a joint proposal to co-host SDSN Uzbekistan to the Networks Strategy Council. To date, Uzbekistan counts eight member institutions and this strategic partnership and the establishment of the new national network will mobilize national expertise to

support the Uzbekistan government's efforts to advance on the SDGs and the Paris Climate Agreement.

A Trusted Knowledge Partner: The SDSN Hosts Sessions at Leading Sustainability Conference

From June 16 to 19, 2025, the SDSN took part in the Sustainability Research and Innovation (SRI) Congress — one of the world's leading academic conferences on evidence-based, actionable, and inclusive approaches to sustainability. As a *Lead Partner*, the SDSN led a series of sessions, exploring how transformative change requires new ways of working across disciplines, sectors, and geographies.

The *Networks of Impact: The Role of Higher Education & Research Institutions in Advancing Sustainability Solutions* session emphasized the need for international and interdisciplinary collaboration, calling for a "coalition of the willing" across sectors and disciplines to reform frameworks for research and cooperation. On this panel, Maria Cortes-Puch, the SDSN's VP of Networks, highlighted the organization's efforts to mobilize universities, create tools, and foster networks that support SDG implementation.

Two of the SDSN's national networks also hosted sessions. SDSN Mexico highlighted successful multi-stakeholder partnerships promoting collaborative decision-making and community engagement, while SDSN USA highlighted the "Leave No One Behind" (LNOB) imperative and demonstrated how community engagement, disaggregated data, and partnerships can inform a Voluntary Local Review (VLR) for a vulnerable community in the United States.

Enhancing Cooperation and Peer Learning: The Annual Meetings of the SDSN Network Chairs and Managers

Throughout the final years of the 2030 Agenda, the role of the SDSN Networks in accelerating progress on the SDGs

is more pivotal than ever. In September 2025, the SDSN convened Network Chairs through its flagship annual gathering that reinforced alignment and accelerated collective impact. The Network Chairs Meeting in New York brought together 15 Chairs in person and nearly 40 online to spotlight regional progress, share innovative approaches, and deepen peer learning across Networks. Focused on driving the SDGs to 2030 and beyond, Network Chairs also engaged in discussions around how to shape the post-2030 narrative, advocating for the extension of the SDGs beyond 2030 with greater ambition, stronger commitments, and enhanced resources. The day-long meeting included a roundtable discussion with Harshani Dharmadasa, Senior Director Global Partnerships and Initiatives at the United Nations Foundation.

Building on that momentum, in November 2025 Managers and Chairs from 23 Networks met in Sunway City, Malaysia, for the Global Network Managers Workshop, a four-day convening co-organized with the Institute of International Affairs, Qianhai, and hosted by Sunway University. Through thematic sessions and external engagements, participants exchanged practical lessons, forged new partnerships, and sharpened strategies to advance sustainable development at local, national, and regional levels.

In May 2026, the SDSN convened the Networks' leadership in Rome during the annual Network Chairs Meeting to explore a changing geopolitical landscape, the SDSN's efforts to accelerate the SDGs, and the emerging debates on the post-2030 Agenda. The meeting took place during the *European Innovation for Sustainability Summit 2026*, hosted by EIIIS, a Rome-based institution focused on education, research, and consulting to advance environmental, social, and economic sustainability.

Network Chairs discussed frameworks and scenarios for advancing sustainability goals beyond 2030, including the resources, partnerships, and political commitment needed to shape the next global development agenda. Themes

SDSN Mexico at SRI 2025 Congress

Maria Cortes-Puch, VP of Europe and Networks

included peace as a foundational condition for sustainable development, cross-regional collaboration, youth engagement, and the role of universities in driving sustainable development. Key insights included the importance of peace as a foundational goal for sustainable development, the need for greater cross-regional collaboration, and the role of universities in the implementation of the SDGs and in the shaping of the Post-2030 Agenda.

The discussions emphasized the significance of engaging youth, strengthening multilateral cooperation, and addressing systemic barriers to progress. Participants shared examples of successful initiatives from their respective regions, including capacity building, policy advocacy, and cross-sector collaboration. They also highlighted the need for cooperation across different governance levels, while stressing the importance of universities adopting a more practical approach in supporting governments with solutions rather than just theoretical knowledge. Overall, the meeting underscored the need for a more coordinated approach to accelerate SDG implementation.

From Science to Solutions: Mobilizing Knowledge, Partnerships and Action Ahead of COP31

In the lead-up to the 31st Conference of the Parties (COP31) in Antalya, Türkiye, the SDSN, in partnership with

"The SDSN brings together more than 2,200 knowledge institutions to turn science into action — strengthening national SDG implementation, empowering youth, shaping global sustainable development priorities, and providing the tools, evidence, and momentum needed to accelerate the 2030 Agenda and the Paris Climate Agreement."

Maria Cortes-Puch, VP of Europe and Networks

SDSN Türkiye and SDSN Australia, New Zealand, and the Pacific hosted a four-part webinar series, "From Science to Solutions: Mobilizing Knowledge, Partnerships and Action Ahead of COP31," running from June 2026 through September 2026. Sessions focused on: climate ambition, inclusive implementation pathways, the vital role of women's leadership in advancing climate diplomacy, the energy transition, circular economy strategies, and climate finance for impact. The series aimed to mobilize the global scientific community, strengthen cross-sector partnerships, and generate actionable insights ahead of COP31. It provided a platform not only for dialogue, but also for advancing policy momentum and implementation in the lead-up to the important climate negotiations.

The Networks in Action report showcases the SDSN's commitment to accelerating SDG implementation and progress through global partnerships for localized impacts. Featuring the SDSN's global network of problem solvers and their contributions to addressing the world's most pressing challenges, this year's report highlights the remarkable achievements of our national and regional networks from September 2024 through May 2026. As the SDSN nears its 15th anniversary in 2027, explore our progress to date as we continue working towards a more sustainable future!

SDSN Network Chairs Meeting 2025 in New York in September 2025

SDSN Youth

Since 2015, the SDSN Youth has emerged as one of the leading global youth networks on sustainable development. As SDSN's flagship initiative for young people, it pursues its mission to empower and equip youth worldwide with the skills, knowledge, and opportunities necessary to contribute to sustainable solutions. SDSN Youth leads capacity-building projects, amplifies youth voices, and nurtures a global youth community, all supported by a global network of more than 350 member organizations. In its 10 years of impact, SDSN Youth has trained over 1,700 youth worldwide across 300 cities and universities, and currently supports 23 national and regional youth networks with regional representation in over 45 countries that work to localize sustainable development in their countries and regions.

SDSN Youth's work wouldn't be possible without the efforts of its volunteers, a current assembly of over 40 members, hailing from over 30 countries. Throughout 2024 and 2025, these volunteers have reached over 11,500 youth to assist them in developing leadership skills, understanding the SDGs, and activating change in their communities.

A Youth Vision of the World's Future

Launched in 2026, this new project aims to gather and assess global youth perspectives through a series of regional dialogues on Gender Equality, Climate Change, and the Future of Work. A total of 12 consultations, held throughout March to June 2026, brought together over 400 youth from more than 120 countries and territories to understand their perspectives on the three themes: what has worked, what has not, and young people's hopes and priorities for the remaining years of the 2030 Agenda. Following the consultations, SDSN Youth will publish a brief synthesizing youth perspectives, aspirations, and concerns, along with actionable recommendations for decision-makers to help inform the implementation of the 2030 Agenda and future global efforts. To move beyond consultation toward meaningful participation, the project will also channel youth voices into high-level policy processes. SDSN Youth will present these recommendations to senior representatives of UN Member States, civil society organizations, and academia at major multilateral forums.

The Vatican Youth Symposium

The Vatican Youth Symposium, organized by the SDSN Youth and the Pontifical Academy of Social Sciences

Vatican Youth Symposium. Credits: Gabriella C. Marino - PASS

"Young people are the present and future of sustainable development. As those with the most at stake in shaping a prosperous world, they cannot be left behind."

Raquel Armendariz, SDSN Youth Global Coordinator

(PASS), is an annual gathering of young leaders and experts from around the world, discussing and generating solutions for the most urgent issues of humanity. In April 2025, the Symposium celebrated its ninth edition, bringing together participants under the theme, "Voices of Change: Sparking Hope with Sustainable Solutions." 72 participants from 38 countries took part, including 22 delegates from the Global South, 45 aged 18 to 35, and more than half were women. Across the sessions, panelists reflected on the roles of education, urban development, sustainable entrepreneurship, youth leadership, and industry in shaping — and reimagining — sustainable development. The discussions translated into a concrete set of recommendations, inviting young people worldwide to endorse them and stand with SDSN Youth in accelerating action towards sustainable development.

The Local Pathways Fellowship

Over the past two years, the Local Pathways Fellowship, SDSN Youth's program on sustainable cities, completed its 7th and 8th cohorts, training and graduating over 90 young people worldwide. By providing them with training, professional development sessions, and networking opportunities, the LPF is prioritizing meaningful youth solutions to achieve SDG 11, Sustainable Cities and Communities. Earlier in 2026, the program welcomed its 9th cohort, with 100 exceptional young leaders, representing 81 cities across 41 countries. Over the next few months, leading to their graduation, the 9th Cohort will continue to participate in activities designed to strengthen their leadership and project development skills.

Key Reports & Guides: SDSN Networks Program Resources over the Years

Accelerating Education for the SDGs in Universities: A Guide for Universities, Colleges, and Tertiary and Higher Education Institutions

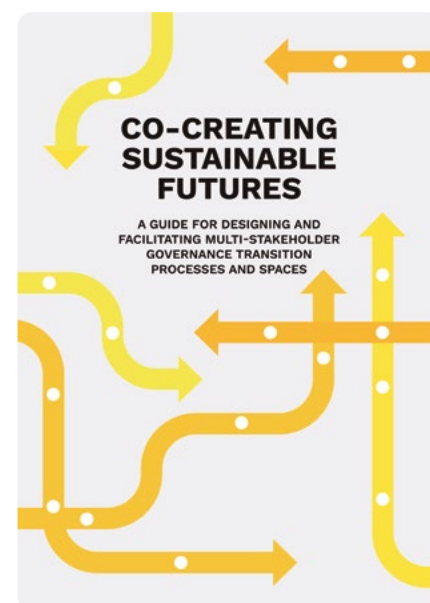

Accelerating Education for the SDGs in Universities is a guide from the SDSN that aims to help universities, colleges, and tertiary and higher education institutions implement and mainstream “Education for the SDGs” within their institutions. The guide was prepared in collaboration with the SDSN Australia, New Zealand & Pacific, the Technical University of Madrid (Universidad Politécnica de Madrid), and Monash University, and includes contributions from dozens of universities and higher education institutions around the world. It updates and expands on the Education section of the widely referenced 2017 publication, *Getting Started with the SDGs in Universities*.

Net Zero on Campus: A Guide and Accompanying Toolkit for Universities and Colleges to Accelerate Climate Action Worldwide

Universities are uniquely positioned to be agents of change as living labs, testing innovations and educating on tools and resources in their institutions, communities, and beyond. With university net zero commitments rising worldwide, the SDSN developed the *Net Zero on Campus Initiative* in collaboration with the Climateworks Centre, Monash University, Second Nature, and the EAUC. Collaborators created a guide and accompanying online toolkit to help universities and colleges accelerate their climate action plans, while creating a new global community of practice. The guide and toolkit focus on the decarbonization of campus operations across energy, mobility, facilities, waste and recycling, and procurement, and more.

Co-Creating Sustainable Futures Guide

The Co-Creating Sustainable Futures Guide is a resource designed to facilitate the transformation towards sustainability in urban environments. The guide offers a practical and methodological approach to the creation of transition tables, multi-stakeholder dialogue spaces designed to address urban challenges in a collaborative manner. Based on systemic thinking, the document highlights the importance of implementing interconnected change processes that are adaptable to dynamic realities.

Climate Innovation, Resilience & Skills Building Projects

coordinated, institution-wide sustainability strategies that integrate governance, operations, and community engagement, while ensuring inclusive approaches across campus stakeholders.

UNICO was launched in January 2026 and officially kicked off with a consortium meeting held in Bilbao in March 2026, followed by a presentation of the project at the [EUIS Summit 2026](#) in Rome. The initial phase of the project focuses on foundational work across the four campuses, including baseline mapping and needs assessment activities to better understand existing climate action structures and identify gaps in decarbonization planning.

"It is too late for climate change prevention, but what we can do – and what CARMINE is doing – is climate mitigation. Through collaboration between the scientific community and decision makers, real progress can happen, and we can be optimistic."

Stavros Solomos, Academy of Athens

The Networks program enhances the visibility and impact of EU-funded projects under Horizon Europe and Erasmus+, supporting systemic solutions and innovative approaches to climate mitigation, adaptation and resilience across Europe, as well as the development of sustainability skills.

Current EU-funded projects include UNICO and CARMINE

University Cooperation for Net Zero on Campus (UNICO) is an Erasmus+ project coordinated by the SDSN in partnership with the University of the Basque Country (SDSN Spain), University College Cork (SDSN Ireland), Politecnico di Torino (SDSN Italy) and Bucharest University of Economic Studies (SDSN Romania). Building on the SDSN's experience through the *Net Zero on Campus Initiative*, the project supports four European universities in strengthening their capacity to design and implement whole-institution approaches to decarbonization and net-zero transition planning. It addresses a key gap in higher education by promoting

Climate-Resilient Development Pathways in Metropolitan Regions of Europe (CARMINE) is a Horizon Europe project that supports climate resilience in eight European metropolitan regions through the co-development of science-based tools, decision-support services and governance frameworks. The project bridges the gap between climate science and practice by integrating participatory approaches in eight local Case Study Areas, where Living Labs enable collaboration between researchers, public authorities and stakeholders to co-design adaptation and mitigation strategies tailored to complex urban systems. A central component of CARMINE is the development of integrated decision-support tools, including Digital Twins, an Atlas of Climate Resilience, and an Impact-Based Decision Support Service (IDSS), designed to strengthen evidence-based policymaking for climate adaptation. The *Stakeholder Community Hub* (SC-HUB) is already operational and provides access to project outputs and resources supporting climate resilience planning.

"It is a pleasure for Birmingham to be part of this EU project. Our key objective is to understand how we can help metropolitan areas become more resilient to future climate challenges. Whether a case study area lies within or outside a European political context, the challenges we face are shared."

Emma Ferranti, University of Birmingham

Within the project, the SDSN leads work on communication, dissemination, and exploitation, supporting the visibility, uptake, and long-term impact of project results. This includes managing project communication channels, supporting partner outreach activities and presenting CARMINE in international forums (such as the SRI Congress 2025 in Chicago or the EIIIS Summit 2026 in Rome). CARMINE is also part of the Resilience of the Built Environment Cluster, strengthening synergies with related European initiatives.

Former projects include ARSINOE, IMPETUS, and CATALYST

Leading Sustainable Systems and Business Transformation (CATALYST) was an Erasmus+ project that aims to strengthen the sustainable competitiveness

"UNICO presents an opportunity for us to identify who is being left behind in our decarbonization efforts, and how we can bring them along moving forward."

John Barimo, University College Cork

of professionals, students, and small and medium-sized enterprises (SMEs). Through its Centre of Vocational Excellence for Leading Sustainable Systems and Business Transformation, the initiative supports personal and organizational development, helps SMEs integrate sustainability into their business models, and promotes collaboration between education, business and policy actors.

Through the CATALYST Platform, the project offers 70 free online courses, specialization programs and resources across three levels: *Leading Sustainable Systems*, *Creating Sustainable Brands*, and *Embracing Sustainable Growth*. These are complemented by Business Pilot Projects and the CATALYST Network, connecting learners, educators, and businesses around sustainable transformation.

Within the project, the SDSN developed the course *Implementing Sustainable Development Goals: Challenges and Enablers*, contributed to the CATALYST Network, and supported international visibility efforts, including a side event at the UN ECOSOC Partnership Forum in January 2026.

Climate-Resilient Regions through Systemic Solutions and Innovations (ARSINOE) was a Horizon

2020 project that supported the development of climate resilience pathways through systemic approaches and stakeholder co-creation. Through nine case studies across Europe, the project tested and applied its methodology in diverse geographic and socio-economic contexts. Project knowledge, tools and innovative approaches were shared through the Climate Innovation Window (CIW), a digital platform showcasing technologies and methodologies for climate adaptation.

The project concluded in September 2025 with a final conference in Brussels, bringing together project partners and stakeholders to share lessons learned and outcomes. Within ARSINOE, the SDSN led outreach to EU and international actors, supporting the dissemination and visibility of project results through stakeholder engagement, strategic partnerships, and participation in international forums. This included contributing to events and policy-oriented activities designed to broaden uptake of project findings and strengthen links between research, policy and practice.

Turning Climate Commitments into Action (IMPETUS) was a Horizon 2020 project focused on strengthening climate resilience and translating climate policy ambitions into practical adaptation actions across Europe. The project worked across seven European biogeographical regions, engaging citizens, policy-makers and businesses in the co-creation of adaptation solutions. Central to this approach were the Resilience Knowledge Boosters (RKBs), which provided spaces for stakeholder collaboration and supported the development and exchange of locally grounded adaptation pathways.

The project concluded in December 2025, contributing tools, knowledge and decision-support approaches to strengthen regional climate adaptation processes across Europe. The SDSN supported dissemination and knowledge-sharing, and leveraged its networks and international fora to amplify project results. A key output was the Massive Open Online Course From Commitments to Action: Transformative Approaches to Climate Adaptation in Europe, developed for the edX platform through the SDG Academy.

UNICO and CARMINE at EIIIS Summit. Credits: EIIIS – European Institute of Innovation for Sustainability 2026)

SDSN Global Climate Hub

Phoebe Koundouri, Chair of the SDSN Global Climate Hub

Five landmark reports covering EU-35, African and Asian case studies, detailing over 300 sector-specific recommendations.

Policy Reform & Evidence-based Advocacy

The Global Climate Hub has delivered five major reports advancing climate-neutral and resilient transitions. Covering Greece, Europe, tourism-intensive Mediterranean regions, and wildfire-flood resilience, the studies integrate energy, land, water, transport, and governance systems into practical policy pathways. Using innovative modelling and decision-support

tools, they identify financing gaps, seasonal risks, and cross-sector synergies, providing actionable strategies for sustainable, cost-effective, and socially equitable climate action.

Local Implementation & Scaling

The AE4RIA Living Labs supported by the GCH create participatory spaces where scientists, policymakers, businesses, and local communities co-design practical climate solutions. Through systems innovation, stakeholder engagement, and evidence-based modelling, they boost sustainable transitions in nexus systems and resilience planning. 67 labs connect scientific research with real-world implementation, helping regions develop locally tailored, socially inclusive, and scalable pathways toward climate neutrality and sustainable development.

Continuous presence in over 100 international sustainability and climate policy debates and high-level fora worldwide.

Hosted by:

Athens University of Economics and Business (AUEB); "Athena" Research and Innovation Center in Information, Communication and Knowledge Technologies (ATHENA RC); Supported by Alliance of Excellence for Research and Innovation on Aegean (AE4RIA)

SDSN Global Climate Hub

SDSN Global Climate Hub

SDSN Global Climate Hub

Network Partnerships, Events, & Flagship Initiatives

SDSN on SustainChain™

In February 2025, the SDSN partnered with SustainChain™, a public service platform developed by the U.S. Coalition on Sustainability and aimed at scaling the solutions and actions necessary to accelerate progress toward sustainable development. Purpose-built to support networks working toward the SDGs, the platform provides real-time insights into sustainable development progress across industries, identifies pathways to impactful and scalable solutions, and serves as a trusted public database for sustainability solutions and initiatives. SustainChain™ also offers tools to align innovation, funding, and expertise to foster collective action.

This partnership provides the SDSN's global community with access to critical resources, tools, and AI-driven insights on sustainable development. Members have the opportunity to discover and forge new connections with the private sector, innovators, impact investors, and other academic institutions and influence how the platform evolves to serve their sustainability goals. Engagement not only occurs within the SDSN network, but also across numerous other sustainability alliances and coalitions which members have access to. As a science-based organization at the forefront of innovation and technological advancements, the SDSN leverages the SustainChain™ platform, powered by machine learning and artificial intelligence, to enable its community to collaborate with key stakeholders across the sustainability sector.

Our exclusive hub for sustainability experts and practitioners aims to help turn ideas into action, provide inspiration, and facilitate the exchange of knowledge and expertise within our global network of problem solvers. As part of the community, representatives from SDSN member institutions can identify and connect with peers, increase the outreach of their projects and activities, position their organization as leaders in their field, find new prospects for collaboration, ask questions, identify funding opportunities, and draw upon the community's ever-growing expertise. Regular content includes a monthly spotlight on one of our incredibly diverse members, highlighting their work in our "Member Mondays" post and a comprehensive weekly compilation of funding opportunities in sustainable development.

To date, our community boasts over 750 individuals across one global group and five regional sub-groups.

"With the 2030 deadline fast approaching, the urgency to accelerate progress toward the SDGs has never been greater. At SDSN, we are committed to fostering synergies and collaboration to maximize collective impact, avoid inefficiencies, and ensure meaningful progress. By connecting the more than 2,200 SDSN member institutions with each other and the broader SDG ecosystem already on SustainChain™, this partnership will play a pivotal role in amplifying the SDSN's work, impact, and leadership."

Maria Cortes-Puch, Vice President of Europe and the Networks Program at the SDSN

The SDSN invites all faculty, researchers, and staff at our member institutions to [join](#) and actively participate.

Universities for Goal 13: An international student competition for climate action

Universities for Goal 13 is an annual competition, fostered by Siemens Energy in collaboration with the SDSN, to recognize students' talent and their critical role in the quest for new technologies and innovative solutions to combat climate change and its impacts. It aims to foster practical solutions for achieving SDG 13 on Climate Action through multi-disciplinary perspectives and collaboratively.

The competition is open to undergraduate and graduate students from participating universities selected from across the SDSN's worldwide membership. Throughout the competition, students work across disciplines to produce creative solutions for the energy transition

SDSN and Siemens Energy leadership attending Universities for Goal 13 award ceremony. Credits: The SDSN

"This is a great high point for the SDSN. The program of Universities for Goal 13 inspires students all over the world, all across our network. The student groups and mentors from Siemens Energy do a fantastic job in inspiring action to combat climate change."

Prof. Jeffrey Sachs, President of the SDSN

and environmental sustainability. They also receive dedicated mentorship from Siemens Energy staff to enhance their projects. The winner is awarded a USD \$10,000 cash prize and opportunities for further development and networking.

The finalists are selected after progressing through several competitive rounds where their solutions are rigorously evaluated based on innovation, feasibility, and potential impact on climate action and sustainable development. The following finalists' solutions are available for viewing:

- **4th Edition** – Winner: 'Turning Algae into the Future of Clean Industry'
- **3rd Edition** – Winner: 'OG2OW: Recommissioning Oil & Gas Platforms to Offshore Wind Energy'
- **2nd Edition** – Winner: 'E-Gora: The Energy Marketplace'

The competition's 5th edition, launched in October 2025, included participation from: Monash University in Australia; Tsinghua University in China; Case Western

Reserve University in the U.S.; the Bucharest University of Economic Studies in Romania; DEUSTO University in Spain; University College London in the UK; the Pontifical Catholic University of Rio de Janeiro (PUC-Rio) in Brazil; and Chalmers University of Technology in Sweden.

Mapping the Just Transition Initiative

In early March 2026, the SDSN, in collaboration with Siemens Energy, launched a global search for initiatives demonstrating that a transition to a low-carbon economy can be both effective and equitable. The SDSN invited its global members and partner institutions to submit outstanding initiatives advancing a

just transition. The concept of "just transition" highlights the need for the shift to a low-carbon economy to be not only effective, but fair and inclusive — placing people at the center, protecting livelihoods, creating decent jobs, and supporting vulnerable communities.

The most compelling cases were showcased in a large-scale dissemination campaign alongside the UN High-Level Political Forum (HLPF) in July 2026 to inspire action worldwide. Selected solutions can be viewed here.

University Presidents Meetings (UPM)

Over the past 10 years, universities around the world have paved the path for advancing the SDGs, including introducing new teaching and research programs; instituting new university-wide SDG initiatives; re-engineering the campuses to eliminate greenhouse gas emissions; and convening governments, business, and civil society to find solutions to the most pressing SDG challenges of their communities and nations.

Since 2020, the SDSN has convened University executive leadership worldwide to discuss higher education's central role in achieving the SDGs. In October 2026, the SDSN will host the fourth edition of the University Presidents Meeting, a biannual convening of Presidents and Rectors, to discuss and highlight the collective commitment of higher education institutions to advancing sustainable development through education, research, and global cooperation. One meeting per region will take place for University leaders in: Europe, Middle East, Central and South Asia; East Asia and the Pacific; Africa; and the Americas. The virtual convenings include the participation of United Nations representatives, national government officials, and other regional-level experts. A standalone volume collects and summarizes the scintillating presentations made during the 2022 edition of the online gatherings, while a blog captures the highlights of the 2024 edition.

Global University Talent & Partnership Insights

The SDSN established a strategic and enduring partnership with Qianhai, Shenzhen, China. Qianhai, formally known as the Qianhai Shenzhen-Hong Kong Modern Service Industry Cooperation Zone, is a commercial and technological hub located in the Nanshan District, Shenzhen. Often described as a "special zone within a special zone," Qianhai is strategically positioned to bridge Mainland China and Hong Kong¹ as a hub for finance, technology, and modern services that creates strong demand for global talent.

Qianhai, Shenzhen. Credits: Darmau on Unsplash.

Under this key partnership, the SDSN and Qianhai established the **Qianhai Global Talent Network Program** to strengthen international talent exchange and deepen collaboration with leading universities, researchers, policymakers, and young professionals worldwide. By leveraging the SDSN's global university network, the program supports Qianhai's talent development objectives while promoting its innovation ecosystem and development opportunities to an international audience. The program serves as a platform to build long-term partnerships that connect global expertise with Qianhai's sustainable development priorities.

One of the SDSN's key partners in Qianhai is the Institute for International Affairs (IIA), a leading policy research institute affiliated with The Chinese University of Hong Kong, Shenzhen. Led by Professor Yongnian Zheng, IIA has been a pivotal trusted partner in advancing the Qianhai Global Talent Network Program through joint research, policy dialogue, international engagement, and collaboration with the SDSN's global university network.

Professor Yongnian Zheng, Director of IIA Qianhai, speaks at the 2025 GBA-ASEAN Conference in Qianhai. Credits: SDSN and GAI

Building on this partnership, the SDSN has helped bring global talent, university resources, and international academic networks closer to Qianhai through a range of activities.

The GBA-ASEAN Initiative (GAI)

The SDSN's partnership with Qianhai has been further deepened through the **GBA-ASEAN Initiative (GAI)**. GAI is an action-oriented program designed to strengthen connectivity between the Greater Bay Area of China (GBA) and the Association of Southeast Asian Nations (ASEAN), with a focus on economy, academia, technology, culture, and talent.

The GBA, including Hong Kong, Macao, and the nine major cities of Guangdong, constitutes one of the world's great growth poles, and a crucial partner for ASEAN. GBA, on the one hand, hosts a unique combination of world leaders in international finance, cutting-edge technology, and advanced manufacturing facilities. ASEAN on the other hand, as a unified market, is seen as one of the most promising regions today with its diversified opportunities across manufacturing, services, digital economy, energy transition, and other essential sectors.

GAI aims to help build a strong GBA-ASEAN partnership, building linkages through trade, technology, finance, culture, tourism, and higher education, to support the rapid sustainable development of The Regional Comprehensive Economic Partnership (RCEP) region overall, with benefits extending not only to China and ASEAN, but to the other RCEP members and the whole world.

¹ Wikipedia: <https://en.wikipedia.org/wiki/Qianhai> and Cathay Pacific: https://www.cathaypacific.com/cx/en_HK/inspiration/travel/qianhai-guide.html

A core dimension of this initiative is talent development. GAI provides an important platform to mobilize university-based expertise and connect Qianhai with global higher education resources. Through the SDSN's national and regional networks, university leaders, researchers, young professionals, and policy experts are able to engage with governments, local institutions, and private-sector partners in Qianhai.

GAI helps strengthen Qianhai's connections with leading universities and supports Qianhai's international visibility by introducing its development opportunities, innovation ecosystem, and talent-friendly policies to a broader community. This network-based approach helps build long-term talent pipelines.

2025 GBA-ASEAN Conference on Trade, Finance, and Sustainable Development

One of GAI's flagship events is the GBA-ASEAN Conference, which is organized twice annually: one conference hosted on a rotating basis in an ASEAN country, and one hosted in cities across the GBA region. With support from the Nanshan Government and the co-organization of IIA, CUHK-Shenzhen and the University of Hong Kong, the inaugural conference was successfully held on October 31 and November 1, 2025, in Hong Kong and Shenzhen. The conference brought together more than 200 leaders from business, academia, government, and multilateral organizations to discuss key issues related to regional cooperation. The SDSN's global secretariat members as well as Network Managers from across the SDSN's 60 national and regional Networks, also participated in the conference.

The conference was especially significant for Qianhai's global talent development and international visibility efforts. University participation was a central feature of the convening. Speakers and participants included:

- Jeffrey Sachs, University Professor at Columbia University and President of the SDSN
- Xiang Zhang, President of The University of Hong Kong
- Heiwei Tang, Associate Vice President of The University of Hong Kong
- Alan Chan, Provost of Singapore Management University
- Kenneth Wong, Director of the School of Governance and Policy at The University of Hong Kong
- Richard Wong, Provost and Deputy Vice-Chancellor of The University of Hong Kong
- Yike Guo, Provost of The Hong Kong University of Science and Technology
- Xuan-Vinh Vo, Dean of the Institute of Business Research at the University of Economics Ho Chi Minh City
- Sun Sun Lim, Vice President of Partnerships and Engagement at Singapore Management University
- Xiao Geng, Associate Dean of the School of Public

Policy at The Chinese University of Hong Kong, Shenzhen

- Zhao Changwen, Chair Professor at Lingnan College, Sun Yat-sen University

One of the most relevant sessions, "Human Capital as the Engine for Economic Growth, Sustainability, Peace, and Cross-national Collaboration," focused on the role of higher education in fostering economic collaboration and cultural exchange. Discussions centered on human capital investment, innovation, international academic programming, and forward-looking university partnerships. By bringing together university leaders, scholars, and policy experts from the GBA, ASEAN, and the SDSN's wider global network, the conference helped connect Qianhai with global university resources and raise its international exposure and attract potential talent and partnerships.

In the second part of the two-day high-level GBA-ASEAN conference, the Shenzhen Nanshan Shangri-La hotel hosted participants and served as the site for the conference activities and networking opportunities among attendees. Among others, SDSN Network Managers were able to connect with local, regional, and global leaders from political, business, and academic spheres. By facilitating strategic dialogues, the conference in Shenzhen focused on panel discussions where participants addressed technology, innovation, and the future of industry cooperation throughout the GBA-ASEAN region.

Global university leaders speak during Panel 4 at the 2025 GBA-ASEAN Conference. Credits: The SDSN and GAI

2025 Global Network Managers Workshop: Mobilizing the SDSN's Global University Network for Qianhai

The 2025 SDSN Global Network Managers Workshop was a key activity linking Qianhai with the SDSN's global university-based talent network. Immediately following the GBA-ASEAN Conference and held from November 3 to 6, 2025, in Sunway City, Malaysia, the workshop was co-organized by the SDSN and the IIA, Qianhai, and hosted by Sunway University. It brought together Managers and Chairs from 23 SDSN national and regional networks, all of whom work closely with universities, research institutions, students, governments, and civil society partners in their regions.

The workshop served as an important partnership platform for the SDSN's global network community. Network Chairs, Managers, and SDSN Secretariat staff exchanged experiences, reflected on lessons learned, and explored new partnerships to accelerate progress on the Sustainable Development Goals (SDG) at local, national, and regional levels. Featuring several sessions focused on strengthening SDG implementation and collaboration, it kicked off with a key session on filling SDG data gaps where discussions focused on how the SDSN and its partners are working to improve access to reliable and timely information.

Other discussions explored the past, present, and future of the SDGs; how higher education institutions are partnering with cities to achieve net-zero targets by applying the SDSN Net Zero on Campus Guide, associated toolkit, and community of practice; and a showcase of SDSN networks that have established successful and inspiring university-city partnerships.

The workshop also featured external sessions led by the Asia School of Business (ASB) and the Jeffrey Sachs Center on Sustainable Development (JSC), Sunway University, which highlighted the vital role of academia and the private sector in sprouting innovations and advancing sustainability. During the four-day convening, participants took part in a walking tour of Sunway City and the Sunway University campus. The workshop concluded with a session on strategic stakeholder engagement, in conjunction with the World Business Council for Sustainable Development's (WBCSD) 2025 Leadership Program.

SDSN Global Network Managers Workshop 2025 Session. Credits: The SDSN

Sunway University Campus Visit during SDSN Global Network Managers Workshop. Credits: The SDSN

The participation of IIA as a co-organizer was especially significant. Through this collaboration, Qianhai was introduced to SDSN network leaders representing almost two dozen national and regional networks. These sustainability leaders serve as key connectors between higher education institutions and local implementation partners in their regions. Through this convening, the SDSN and IIA Qianhai helped strengthen the institutional relationships and knowledge channels through which Qianhai can engage with global universities, research centers, and sustainable development practitioners.

This workshop created a valuable opportunity to raise Qianhai's visibility within the SDSN's global university network and build a foundation for future collaboration with academic institutions, researchers, students, and sustainable development professionals worldwide.

Deepening Research Collaboration in Qianhai

On March 26, 2026, the SDSN President, Professor Jeffrey Sachs; Guillaume Lafortune, Vice President and Head of SDSN Asia; and Philo Wang, Head of Policy and Research for Asia and SIDS at the SDSN, visited the Institute of International Affairs, Qianhai (IIA) in Shenzhen for a research seminar with IIA and scholars from universities and research institutions in the GBA.

The seminar was hosted at IIA Qianhai and moderated by Professor Ping Huang. Professor Yongnian Zheng, Director of IIA Qianhai, and Professor Sachs delivered opening remarks. Guillaume then presented the GBA-ASEAN Sustainable Development Report, followed by research briefings from IIA, the Institute of Public Policy at South China University of Technology, and the Guangzhou Institute of GBA. The discussion, led by Professor Sachs, focused on GBA-ASEAN Initiative research collaboration with IIA and long-term economic planning toward 2050.

By bringing the SDSN leadership and international research expertise directly to Qianhai, the workshop helped strengthen Qianhai's connections with SDSN's global academic network and regional research

institutions. It also supported the broader talent development objective by creating opportunities for policy researchers, university scholars, and sustainable development experts to engage with Qianhai's long-term development agenda.

Looking Ahead

Through these activities, the Qianhai Global Talent Network Program has helped build channels for dialogue and cooperation between Qianhai and a broader international community of universities and young professionals. These engagements have shown that Qianhai is not only an innovation platform, but also an attractive destination for global talent to study, work, and create.

As Qianhai continues to expand its role in finance, technology, modern services, and international cooperation, it will require a growing pool of global talent, who can bring international expertise and innovative ideas. By engaging with SDSN's global university network, Qianhai is strengthening its visibility among leading academic institutions and building the foundations for a more open, international, and talent-driven development ecosystem.

Donors & Partners

The SDSN Networks Program team is grateful for the support received from the following donors and partners:

- William, Jeff, and Jennifer Gross Family Foundation
- Dr. Betsee Parker
- Cleveland Foundation
- European Climate, Infrastructure and Environment Executive Agency (CINEA)
- European Education and Culture Executive Agency (EACEA)
- Ford Foundation
- Jeffrey Cheah Foundation
- La Caixa
- Ministry of Economy and Finance of the Republic of Uzbekistan
- Monash University
- Siemens Energy
- The Institute for International Affairs, Qianhai
- TPC (Tsao Pao Chee) - NO.17 Foundation
- Wellcome Trust

The SDSN mobilizes the world's leading knowledge institutions and leverages their strengths to help promote practical solutions to sustainable development challenges and realize the SDGs and the Paris Agreement. Spanning six continents, the SDSN network comprises over **2,200 member institutions**, primarily universities, coordinated by **60 national and regional Networks**.

The SDSN's national and regional networks focus on distinct projects that translate the global goals into locally-led solutions shaped by national and regional priorities. Our Networks leverage the latest expertise in sustainable development into action by: (1) Promoting high-quality education and research collaboration for sustainable development; (2) Localizing and mobilizing support for the SDGs, including supporting governments in understanding and addressing the challenges of sustainable development; and (3) Vetting and launching solution initiatives.

Become a Member

Our global network of problem solvers is always expanding. Join us and enhance national and regional capacity to address sustainable development challenges.

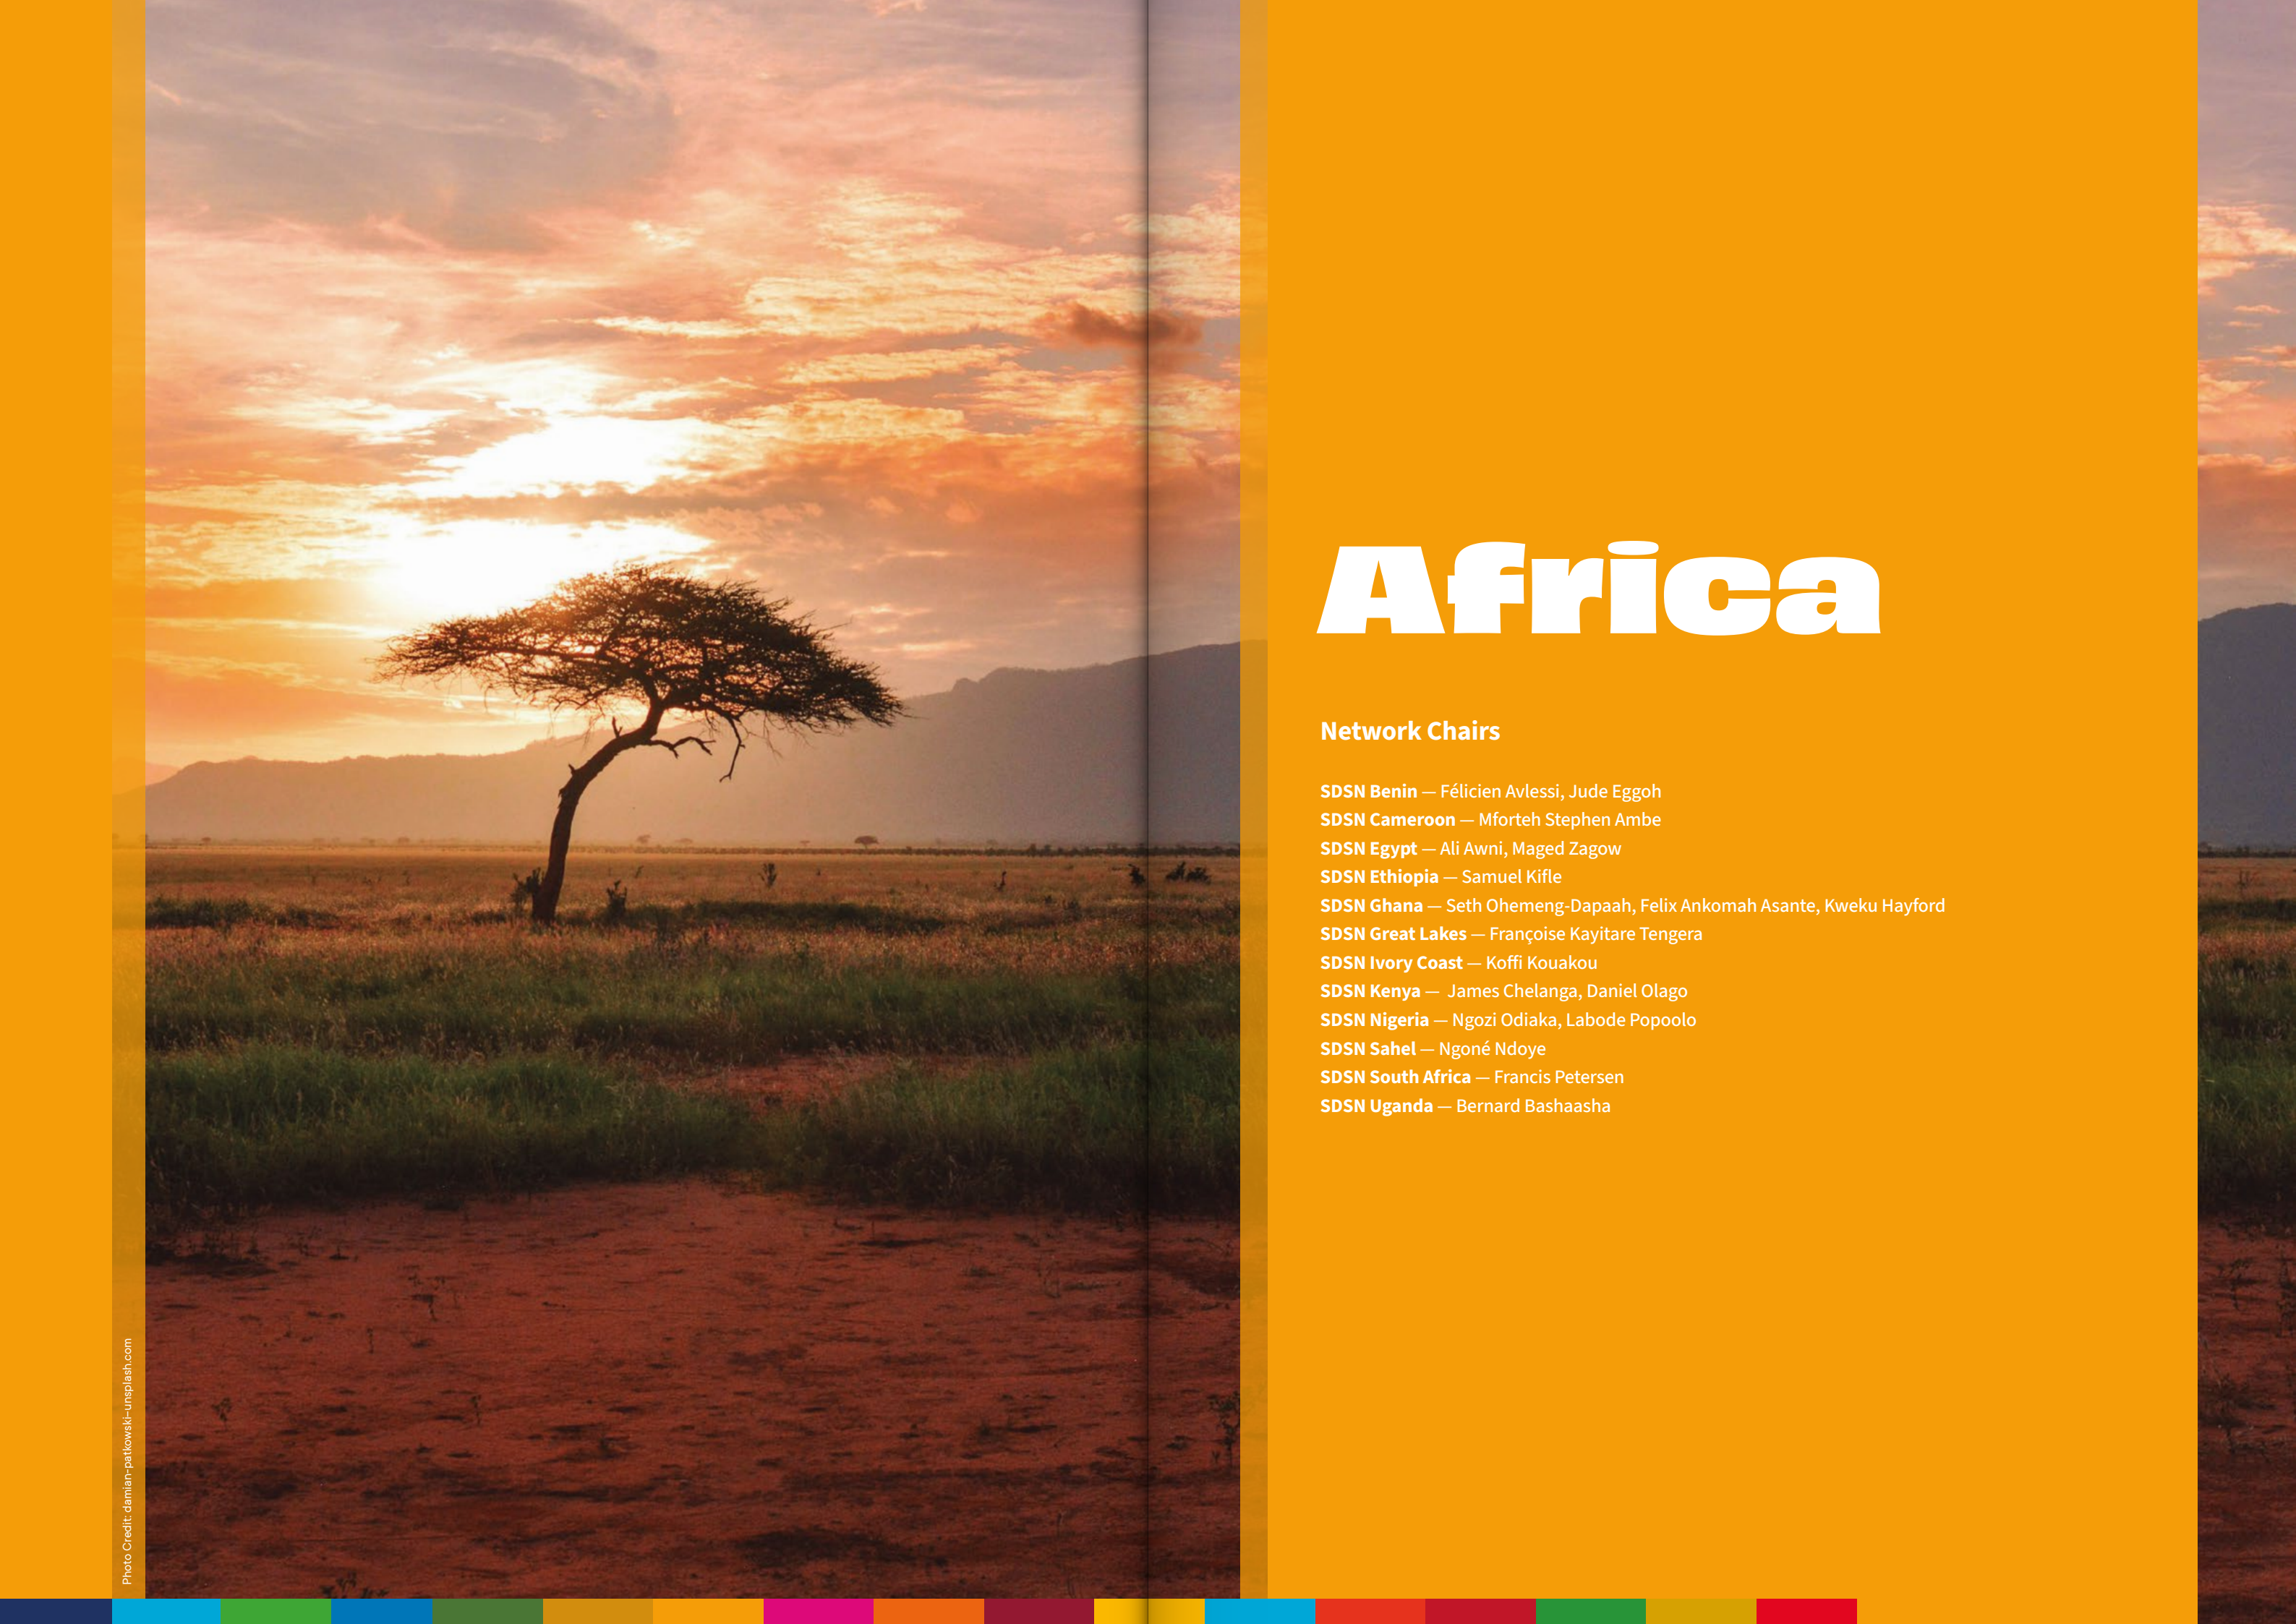

As a member of the Sustainable Development Solutions Network, your institution will be part of a unique network of problem solvers and contribute to practical solutions for sustainable development. Together, we work towards supporting sustainable development in three main areas:

1. Promoting high-quality education and research collaboration for sustainable development;
2. Localizing and mobilizing support for the SDGs, including supporting governments in understanding and addressing the challenges of sustainable development; and
3. Vetting and launching solution initiatives.

SDSN Membership is free and open to any university, research institute, research- and science-oriented civil society organizations and foundations, and other institutions that have deep expertise in one or more areas related to sustainable development.

Government entities and private sector institutions/for-profit businesses are not eligible for membership but are welcome to join as partners. Universities can join at the level of the university or an individual department/institute.

Applying for the SDSN membership is simple – the online membership application form is on our [website](#) and is available in English, French, Portuguese, and Spanish.

Around **100 participants** convened for the Senior Policy Dialogue, including researchers, policymakers and development practitioners.

SDSN Benin

Hosted by:

Directorate of Research
and Strategic Studies
University of Abomey-Calavi
SDSN Benin

First Youth Forum on Sustainable Development Solutions organized by SDSN Benin. Credits: SDSN Benin

Along with network members, **33 youth solutions** submitted across SDG sectors: health, energy, agriculture, education, and waste.

LOCAL IMPLEMENTATION & SCALING

At the local level, SDSN Benin supported SDG localization through Voluntary Local Reviews (VLRs) and assessments in Aplahoué, Bohicon, Lokossa, and Zè. It strengthened local planning, monitoring, and alignment with SDG targets. The network also contributed to the Community Performance Bulletin, a citizen-based tool tracking SDGs 2, 6, and 13. These initiatives improved data use for decision-making, reinforced accountability, and fostered collaboration among local governments, civil society, and communities, with strong replication potential.

NETWORK MANAGERS

Achille Assouto advances research and policy dialogue on development economics, human capital, and sustainable development in Benin. He promotes stakeholder engagement and evidence-based solutions to support the SDGs. Since 2022, he has contributed to macroeconomic analysis, policy modelling, and strategic economic studies at Benin's Directorate General of Economy, while conducting research with the University of Orléans and the University of Abomey-Calavi.

Nadia Fanou Fogny strengthens nutrition research, academic leadership, and food security policies in Benin and across West Africa. As Dean of the Faculty of Agronomic Sciences at the University of Abomey-Calavi, she has expanded research and training in human nutrition and food systems. Her work advances community-based solutions to malnutrition, maternal and child health, and micronutrient interventions, while supporting regional and international collaborations on sustainable nutrition and public health.

Four municipalities supported in SDG localization: Aplahoué, Bohicon, Lokossa, Zè.

SDSN YOUTH BENIN

SDSN Youth Benin strengthened youth engagement with the SDGs by creating platforms for participation and innovation. To address limited youth inclusion in SDG processes, it organized the first Youth Forum on Sustainable Development Solutions, gathering students, young innovators, and partners to present projects in agriculture, health, energy, education, and waste management. The initiative increased youth visibility in development debates, strengthened collaboration among young actors, and created a replicable platform for scaling youth-led SDG solutions nationwide.

SDSN YOUTH NETWORK COORDINATOR

Sèlomè Ayéfèmi Assogbadjo is an aspiring Agronomic Engineer specializing in Human Nutrition and Food Sciences at the University of Abomey-Calavi. Ranked among the top students in her class, she combines strong academic performance with field experience gained through internships, by coordinating SDG leadership and entrepreneurship webinars, and by supporting STEM outreach for young girls in Benin. Driven by rigor and commitment, she aims to apply nutrition, public health, and data-driven approaches to advance food security and sustainable development in Africa.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

Since its launch in November 2025, SDSN Egypt—co-hosted by AUC and Galala University—has convened academia, civil society, and international partners. SDSN's president, Jeffrey Sachs, participated in the launch event, which established a national SDG platform emphasizing cooperation and science-based action. Follow-up events, including lectures by global leaders and academic-industry collaborations at Galala, strengthened cross-sector dialogue and created a strong network effect linking local challenges with global expertise.

SDSN Egypt Secretariat leadership with Prof. Jeffrey Sachs. Credits: SDSN Egypt

The launch of SDSN Egypt convened more than **200 stakeholders** across academia, policy, and civil society to advance SDG collaboration.

EDUCATION & SKILLS BUILDING

SDSN Egypt advanced capacity building through training programs, entrepreneurship camps, and community-based learning in areas like Ezbet Khairallah. Initiatives included project management training and psychosocial programs for vulnerable groups. At Galala University, SDGs are embedded across curricula, with students trained in sustainable design, AI, and climate resilience. International projects funded by DAAD and the British Council provided hands-on experience, creating scalable models for education and impact.

NETWORK MANAGERS

Pakiname Yousri Mamdouh is a development and civic engagement professional with an MA in Political Science from Saint Joseph University. She currently serves as Senior Manager and Head of the Civic Engagement Unit at the John D. Gerhart Center, where she leads initiatives to institutionalize civic education, social change, and community engagement at national and regional levels. Prior to this role, she spent nearly eight years as a Senior Development Specialist in the Cabinet of Egypt's Minister of International Cooperation, managing cooperation with European countries, coordinating with embassies and development agencies, monitoring development projects, and conducting research on international development and aid.

Soha Mohsen Tabl is an international cooperation professional with over a decade of experience in higher education and scientific research. She serves as Office Manager and International Collaborations Coordinator at the Office of the President of Galala University and as Co-Manager of the SDSN Egypt Network, where she advances international partnerships and supports the achievement of the Sustainable Development Goals (SDGs).

Equipped **150+ youth and community members** with sustainability and social entrepreneurship skills, fostering local initiatives and action-driven solutions.

EDUCATION & SKILLS BUILDING

SDSN Egypt empowered young changemakers through field visits, entrepreneurship training, and community engagement. Activities exposed youth to real SDG challenges in underserved areas, strengthening leadership and problem-solving skills. Programs fostered creativity, civic responsibility, and practical impact, enabling youth to translate SDG concepts into actionable initiatives and contribute to inclusive and sustainable development.

Established over **five partnerships** with universities, NGOs, and international institutions, enabling the network's strategic expansion.

SDSN Ghana

Delivered diagnostic services to more than **3,000 people** across underserved communities, improving early detection and response.

 Millennium Promise Alliance

 SDSN Ghana

 SDSN Ghana

LOCAL IMPLEMENTATION & SCALING

SDSN Ghana strengthened multi-stakeholder collaboration to localize the SDGs. A key milestone was a symposium organized in partnership with the University of Education, Winneba, which convened academia, policymakers, and practitioners to align research with national development priorities. Before this intervention, engagement between academic institutions and implementation actors was fragmented. The symposium created a platform for coordinated action, resulting in new partnerships and practical policy dialogues that are now shaping SDG-focused research and community interventions.

University of Education, Winneba hosts inaugural SDSN symposium to propel Ghana's SDG Agenda. Credits: SDSN Ghana

Convened over **120 stakeholders** catalyzing cross-sector partnerships and aligning research and SDG implementation efforts.

LOCAL IMPLEMENTATION & SCALING

During the same period, Millennium Promise Alliance launched its Tropical Laboratory Initiative to expand access to essential laboratory and diagnostic services in underserved communities. Previously, limited infrastructure constrained timely health and environmental testing, affecting both service delivery and data-driven decision-making. The initiative addressed this gap by deploying accessible, community-centered laboratory solutions, improving early detection, response capacity, and local resilience. This model is scalable and replicable across similar contexts, with strong potential for a network effect as partners adopt and adapt the approach in other regions.

NETWORK MANAGER

George Osei-Bimpeh leads network coordination and engagement efforts, building strong partnerships across communities and institutions. He drives initiatives that empower institutions and communities to take active roles in development processes, while strengthening collaboration among stakeholders. Through his work, he amplifies marginalized voices, supports institutional collaboration, coordination and capacity building, and ensures that local insights shape sustainable and inclusive solutions.

Beach cleanup participants. Credits: SDSN Ghana Youth

SDSN YOUTH GHANA

SDSN Youth Ghana launched in late 2024 and has advanced youth leadership and participation in sustainable development by equipping young people with skills, platforms, and opportunities to engage in SDG advocacy and implementation. Through targeted programs and collaborations, including webinars, beach clean-ups, and events that have convened over 350 participants, the youth network strengthened youth-led initiatives and fostered peer learning across institutions. These efforts have led to increased youth representation in national development conversations and a growing network of young changemakers driving localized solutions within their communities.

SDSN YOUTH NETWORK COORDINATOR

Johnnie Kojo Hayford leads SDG localization efforts, mobilizes youth through solution initiatives, and represents the sector through collaborations with Youth4Climate and the World Bank Group. Alongside this, he advances disability inclusion by providing sign language interpreting, developing Individualized Education Programs (IEPs), training teachers in Universal Design for Learning (UDL), and leading community accessibility campaigns for ramps and inclusive church services.

"Empowering educators is not a choice—it is a necessity."

Eng. Pascal Gatabazi, Chief Technical Advisor
to the Ministry of Education in Rwanda

SDSN Great Lakes

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

From 14–16 May 2025, SDSN Great Lakes, with the College of Education at the University of Rwanda and the Mastercard Foundation, hosted the 3rd International Conference on Reshaping Education for Sustainable Development in Kigali. It addressed fragmented collaboration among academia, policymakers, and practitioners by convening global stakeholders to advance climate education, equity, and teacher development, strengthening alignment between education systems, labor market needs, and national priorities.

Over **300 participants** from academia and partners started collaborating on education for sustainable development.

LOCAL IMPLEMENTATION & SCALING

In 2025, the network along with the host institution, the University of Rwanda and partner institutions led community outreach supporting vulnerable families near campuses. Before the intervention, beneficiaries faced poor living conditions and limited access to nutrition and sanitation. Youth mobilized students and local leaders to rehabilitate homes, improve sanitation, and provide essential supplies, improving living standards and social cohesion. The initiative demonstrates a replicable model of youth-led, community-driven development.

Mastercard Scholars at the University of Rwanda engaging in benefaction activity for renovation of houses for vulnerable families in Huye District, Southern Province. Credits: Mastercard Scholars Program at UR

NETWORK MANAGER

Salomon Nshimiyimana leads SDSN Great Lakes at the University of Rwanda, fostering collaboration to advance the SDGs. In 2025, while at the College of Education, he contributed to a series of dialogues on quality education including an annual conference on sustainable development and led many student outreach SDG initiatives to support local communities. As a Campus Administrator, he advances inclusive and sustainable development.

Over **20,000 youth** mobilized in outreach, improving 100 vulnerable families' living conditions and social cohesion.

SDSN Kenya

Improved evidence-based land-use planning, integrated climate policies, and generated land-use detection maps.

Improved policy coherence and integration, frameworks for localization, and developed **two policy briefs.**

LONG-TERM SYSTEMS TRANSFORMATION

SDSN Kenya, in partnership with FOLU Kenya, undertook a Spatial Analysis and Land Use Management Plan project for Nakuru County Government between December 2025 and April 2026. The study analyzed Land Use and Land Cover (LULC) changes, urban expansion, and their impacts on food security and environmental degradation, including vegetation loss, soil erosion, and land conversion. The results generated evidence-based insights to inform sustainable land governance, climate-smart spatial planning, and strengthened policy coherence land use and food systems within the county.

Enhanced collaboration and capacity building on innovative sustainable agri-food systems.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Kenya, along with FOLU Kenya, implemented a youth agripreneurship incubation workshop for food security, advancing agroecology, environmental restoration, climate-resilient agri-food enterprises, and transformative media engagement.

NETWORK MANAGER

Dr. Stella Kasiva Mbiti is a lecturer with over 10 years' experience in environmental restoration, land use, and climate action in Sub-Saharan Africa. She serves as the Head of Landscape Architecture at JKUAT, leading research, policy integration, and multi-stakeholder partnerships. She advances SDG localization by bridging science, policy, and practice through urban regeneration, resilient food and land systems, innovation, education and capacity building initiatives.

Innovative Solutions in Agriculture showcasing at the Kilimo Festival. Credits: Stella Mbiti

SDSN YOUTH KENYA

SDSN Kenya and SDSN Youth Kenya, in partnership with the Kenya Agricultural Students Association, co-organized the Kilimo Festival and Conference 2025 at Murang'a University of Technology under the theme "Empowering Youth for Agri-food Careers." SDSN Youth Kenya engaged around 300 participants from different institutions in discussions on strengthening research, policy, agroecology, climate resilience, and agri-business. The work yielded meaningful progress, from enhancing collaboration to contributing to capacity-building and accelerating agricultural technology, building the skills of local actors, and recognizing youth as essential to the future of agri-food system innovation and sustainable development.

SDSN YOUTH NETWORK COORDINATOR

Michael Kishoyian is the Founder of Ereto Nadupa Organization. He leads anti- Female Genital Mutilation (FGM) campaigns and policy initiatives that amplify youth leadership across Kenya. Through his former role with UNFPA Kenya Youth Advisory Panel and the Global Youth Consortium against Harmful Practices, he mobilizes young advocates to drive gender equality, climate action, and community-led change.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Nigeria chaired the Academic Committee for Nigeria's 3rd Voluntary National Review (VNR) in response to a formal request from the Office of the Senior Special Assistant to the President on the SDGs. The Network mobilized the academic community nationwide to contribute to this strategic process ahead of the High-Level Political Forum in New York in July 2025. SDSN Nigeria actively engaged in consultations across all six geopolitical zones and the final national session in Abuja.

16th Annual Ibadan Sustainable Development Summit co-hosted with the Centre for Sustainable Development, University of Ibadan. Credits: Emmanuel Olowoyo

In 2025, our initiatives reached over **5,000,000 people**, trained more than **20,000 youth** across various programs and capacity-building initiatives, and facilitated over **50 strategic partnership engagements** to advance sustainable development and youth empowerment.

SDSN YOUTH NIGERIA

The efforts of SDSN Youth Nigeria have focused on youth capacity-building on sustainability, including through the SDGs Advocate Program, which has reached over 3,000 youth participants over the past two years and is currently in its 8th cohort. The youth network has also been focusing on climate action with programs like the Climate Actors Accelerator Program (CAAP), National Green Campaign (NGC), and the Conference of Youth on Environment and Climate (COYEC), which supported SDGs 13, 14, and 15 through capacity-building, tree planting, anti-plastic drives, and ecosystem restoration, all while engaging various partners and thousands of youth.

NETWORK MANAGER

Emmanuel Ola-Olowoyo is a Development Systems architect and lecturer at the University of Ibadan. His work focuses on designing scalable systems for SDG implementation across innovation, governance, and policy ecosystems in Africa. Through AIIDEV, he has led initiatives across 40 countries impacting over 10 million Africans. An award-winning leader and TEDx speaker, he advances sustainable development through systems thinking and institutional collaboration.

SDSN YOUTH NETWORK COORDINATORS

Oluwatoyin Odulana is a geographer and sustainable development advocate passionate about using maps, research, and storytelling to drive youth-led impact. Her work sits at the intersection of community mapping, sustainable development, and youth-led impact, using tools like OpenStreetMap, participatory research, and data storytelling to amplify voices and inform decision-making. She has contributed to several mapping projects to support humanitarian efforts, coordinated youth programs, and advanced the SDGs across grassroots spaces.

Ojuoluwa Oluwatobiloba is an independent researcher and rural sociologist working at the intersection of climate justice, food systems, youth livelihoods, and sustainable development policy in Africa. He supports governments, NGOs, private organizations, and mission-driven institutions to design, implement, and support programs aligned with the SDGs. With years of applied experience, his work bridges research, strategy, and real-world implementation, helping institutions move from good intentions to measurable and scalable impact.

SDSN South Africa

SDSN South Africa representatives attended the Y20 Summit 2025, joining over **200 global youth leaders** to shape SDG and G20 policy dialogues.

New York University and Rutgers University students attending a SDSN South Africa workshop at the University of Pretoria. Credits: Kamagano Sethono / SDSN South Africa

In 2024, the network engaged over **300 youth** in discussions on the SDGs, strengthening participation in development dialogue.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In 2024, SDSN South Africa hosted the Transcultural Student Research Group (TSRG), bringing together students from Brazil, Germany, India, Poland, and Vietnam for a collaborative research experience in South Africa. The program fostered cross-cultural exchange and critical engagement on global challenges linked to the SDGs. Through dialogue, fieldwork, and academic collaboration, participants gained contextual insights while contributing to locally grounded research. The initiative highlights SDSN South Africa's role in advancing international partnerships.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN South Africa contributed to national development processes through its participation in working groups and consultations for the drafting of South Africa's SDG Country Report 2025. Published on 31 March 2026 by Statistics South Africa, the report reflects collaborative efforts across sectors to assess progress on the SDGs. SDSN South Africa's involvement underscores its role in shaping evidence-based policy dialogue and strengthening the integration of research, data, and multi-stakeholder engagement in advancing sustainable development in the country.

SDSN YOUTH SOUTH AFRICA

After the establishment of the youth network in 2025, SDSN Youth South Africa launched its Innovation Challenge, reaching all nine provinces and attracting applications from students across more than eight universities. The initiative mobilized young innovators nationwide to develop solutions addressing key SDGs. By creating a platform for collaboration, mentorship, and skills development, the challenge highlights the growing role of youth in driving sustainable development. This nationwide participation reflects SDSN Youth South Africa's expanding network and its commitment to inclusive innovation.

SDSN Youth South Africa Innovation Challenge winners. Credits: Kamagano Sethono

Over **150 applications** were received for the inaugural Innovation Challenge, mobilizing youth-led SDG solutions.

NETWORK MANAGER

Professor Derick de Jongh is Founding Director of the Albert Luthuli Leadership Institute and founder of multiple leadership and corporate citizenship initiatives at the University of Pretoria and University of South Africa. A globally engaged scholar, he focuses on responsible leadership, sustainability, and collaborative leadership, with international academic appointments and contributions to global initiatives.

SDSN YOUTH NETWORK COORDINATOR

Kamagano Sethono is a researcher and a PhD candidate in Leadership at the University of Pretoria. His work explores youth leadership within adult-centric systems. With a background in theology and community development, he focuses on adaptive, ethical leadership, social justice, and advancing youth as active changemakers.

New frog species: *Pristimantis praemortuus*. Credits: Mario Yáñez

New species of *Dracula* orchid. Credits: Callie Broadus

Four side events held alongside COP16 Biodiversity with member organizations, advancing biodiversity and sustainability dialogue.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Andes contributed to the conceptualization and assessment of SDG spillover effects, which examine how countries influence one another's progress toward the SDGs. In collaboration with SDSN Germany, SDSN Andes contributed to a policy brief for the T20, as part of the G20 process. The policy brief, titled "New Forms of International Partnerships to Reduce Negative International Spillover Effects in Support of Global Sustainability," was subsequently handed to the Ambassador of South Africa to Germany by the SDSN Andes Manager, ahead of South Africa's G20 Presidency in 2025.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

To advance both the analysis and the broader conversation on solutions capable of accelerating the energy transition in a sustainable manner, SDSN Andes convened and chaired a panel at a side event held in Cali, Colombia, during the 16th United Nations Conference of the Parties to the Convention on Biological Diversity (COP16). The panel, titled "Threats to Biodiversity from Climate Change and the Energy Transition," underscored the importance of ensuring that the transition away from fossil fuels is pursued in a manner that is fully compatible with biodiversity conservation goals, emphasizing the need for integrated policy approaches, robust environmental safeguards, and cross sectoral coordination to align climate and biodiversity objectives.

NETWORK MANAGER

Jorge Gómez-Paredes is President of the Beyond One Foundation and a governing member of the Charles Darwin Foundation for the Galapagos Islands. He leads Energy Transition Research at Novia University of Applied Sciences (Finland), serves as Adjunct Research Professor at the University of Development (Chile), and lectures internationally. His recent work focuses on SDG spillover effects and biodiversity conservation.

"SDSN Bolivia has been a critical bridge in turning natural and cultural potential into measurable development strategies, advancing a sustainable, regenerative economy and strengthening public policy proposals on tourism and long-term development."

✂️ SDSN Bolivia

The network turns knowledge into scalable local action, partnering with over **48 institutions** and mobilizing more than **USD three million**.

LOCAL IMPLEMENTATION & SCALING

Between 2024 and 2026, SDSN Bolivia strengthened its ability to turn research into territorial action. Studies on tourism and ecosystem services helped place these issues on policy agendas. By 2025, seven of 10 presidential candidates included tourism prominently in their plans, and a new Ministry of Sustainable Tourism was created. Evidence also informed conservation initiatives, including a project to protect the iconic Puya raimondii in Comanche. In 2026, implementation scaled up through Cacao Conecta, launching Bolivia's first Sustainable Cocoa Agrotourism Corridor in northern La Paz.

The new, updated 2026 edition of the Municipal Atlas of the Sustainable Development Goals in Bolivia, forthcoming. Credits: Juan Mamani

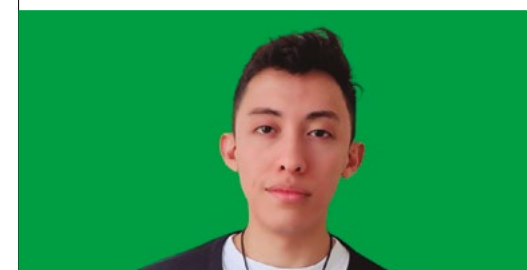

SDSN Bolivia won both inaugural MapBiomass Bolivia awards, highlighting excellence and innovation in spatial data use.

NETWORK MANAGER

Lykke E. Andersen has served as Executive Director of SDSN Bolivia since its launch in 2018. She holds a Ph.D. in Economics and has worked on environment and development in Latin America for over 30 years. According to RePEc/IDEAS, she ranks among the top 5% of female economists worldwide.

SDSN YOUTH BOLIVIA

Following its reactivation in late 2024, SDSN Youth Bolivia strengthened local engagement through targeted initiatives, including a fundraising climbing event supporting volunteer firefighters during the 2024 forest fires and co-organizing the City Nature Challenge 2026 in La Paz. It also advanced education and dialogue by hosting a webinar on International Women's Day that explored inter-generational perspectives on women's and youth participation in sustainable development. These efforts have enhanced the network's visibility and role in fostering youth-led action and inclusive dialogue in Bolivia.

SDSN YOUTH NETWORK COORDINATORS

Having participated in several volunteer organizations, **Diego Calderon Acebey** has developed strategies to strengthen the voices of youth at the local, national, and regional levels. His work spans designing the execution methodology for LCOY 2024, fostering a youth-oriented research and empowerment initiative, and organizing and hosting events in support of environmental and sustainability causes.

Catalina Antezana Sonco turns her passion for nature into action by volunteering with several organizations to promote sustainable solutions for the future. Experienced in communications, her work focuses on developing campaigns to raise awareness of the importance of protecting vulnerable groups.

SDSN Canada

"A standout moment of one of the French sessions was the spotlight on valuable SDG resources, such as the newly released book, *The SDGs: Interdisciplinary Perspectives*... It showcased the depth of interdisciplinary work being done to advance sustainable development in Canada and beyond."

EDUCATION & SKILLS BUILDING

SDSN Canada's *Youth Can Sustain* Certificate is a free, fully online program helping Canadian post-secondary students build skills and experience to lead SDG initiatives in their communities. From January–April, students must attend four or more workshops and complete an SDG Academy course.

In 2026, the program has so far offered 10 workshops, included participants from 33 institutions, graduated 78 students, and ~30 more completed in the spring through the UCalgary–McMaster partnership.

More than **2,000 attendees** joined over **194 events across 31 institutions** during SDG Month Canada 2026.

NETWORK CO-CHAIR AND NETWORK MANAGER

Christine Daly MSc PhD PBIOL advances local and national campus engagement on the UN SDGs as Associate Director of Institutional Commitments at the University of Calgary. In 2025, she served as a Canadian delegate to the UN High Level Political Forum and chaired SDG Month Canada and the Together | Ensemble conference to strengthen awareness, skills, and capacity for national action for the SDGs.

Engaged **over 100 Canadian policy influencers** and more than **228 country representatives** on SDG action through UN forums and Together Ensemble 2025.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDG Month Canada 2026 united higher education and community, government and business partners through a national SDG campaign, driving awareness and action. At least 2,137 attendees participated in 194+ events across 31+ institutions. The national initiative even inspired participation of a group from South Kivu (DRC). Impact highlights include 3,380+ social media users reached, 32 bilingual events, 47 national-audience events spanning nine provinces, and a strong focus on SDGs 4, 11, 12, 13, and 17.

YOUTH ENGAGEMENT

In 2025 and 2026, SDSN Canada partnered with the Sustainable Development Goals Alliance to deliver the annual SDG Summit, a youth-focused training conference advancing sustainable development through learning, dialogue, and networking. In 2025, SDGA was accepted into the SDSN Youth Global Network, strengthening national youth leadership on the SDGs.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

UCalgary, with the Government of Canada's SDG Unit and a national organizing committee, hosted *Together | Ensemble 2025*, mobilizing an all-of-society network to accelerate local SDG action. The hybrid conference drew 500+ registrants, including 247 in person and 162 online, engaging youth, Indigenous Peoples, community leaders, governments, and industry.

"As indicated in the Global Sustainable Development Reports 2019 and 2023, Climate Change is one of the main obstacles to improving human wellbeing and achieving the Sustainable Development Goals."

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

Sustainability and Climate Change Forums were held at The University of the West Indies St. Augustine Campus in Trinidad in February 2025 and the Cave Hill Campus in Barbados in April 2025. For students, these forums offered an opportunity to engage and learn from academia, the private sector and regional agencies working on climate change and sustainability initiatives. They also enabled students to share feedback and ideas on how they would like to get involved and take action to achieve the SDGs.

More than **100 persons** registered and viewed the webinar "Amazonian and Caribbean Youth Voices On the Road to COP30".

YOUTH ENGAGEMENT

SDSN Caribbean collaborated with the Science Panel for the Amazon and SDSN Youth to host a webinar in October 2025 ahead of the 30th Conference of the Parties (COP30) titled "Amazonian and Caribbean Youth Voices On the Road to COP30". The webinar connected young leaders from the Amazon and the Caribbean to discuss climate justice, regional solutions, and COP30 priorities. The virtual event brought together diverse perspectives on how youth, science, and policy can work in tandem to accelerate global climate policies.

SDSN chile

The Just Transition Observatory and Design Unit, by Pontificia Universidad Católica de Chile, was selected by the SDSN as one of the most inspiring and impactful cases from over 30 implemented practices as part of the Just Transition Mapping initiative.

 SDSN Chile

 SDSN Chile

POLICY REFORM & EVIDENCE-BASED ADVOCACY

In 2025, SDSN Chile published “SDGs+10: Chile vis-à-vis the 2030 Agenda: priorities for the countdown”, an evidence-based report assessing Chile’s progress and gaps five years before the 2030 deadline. The report proposes a strategic prioritization across six SDGs — poverty, food security, education, gender equity, inequality, and climate action — calling for accelerated, equity-centered action. It was developed collaboratively by 13 network member institutions spanning universities, think tanks, civil society organizations, and business associations.

13 member institutions collaborated to produce the SDGs+10 report.

Over **50 participants** attended the SDGs+10 online launch event.

NETWORK MANAGER

Nicole Cristi is a Designer and holds a Bachelor’s degree in Aesthetics from the Pontificia Universidad Católica de Chile (PUC) and a PhD in Anthropology from University College London (UCL), United Kingdom. She is a member of the Centre for the Anthropology of Technics and Technodiversity (CATT) at UCL, part of the Red Conceptualismos del Sur (RCSur) network, and a collaborator at the Laboratorio de Biomateriales de Valdivia (LABVA).

Red de Soluciones para el Desarrollo Sustentable (SDSN Chile)

2025

SDGs+10 Chile vis-à-vis the 2030 Agenda priorities for the countdown. Credits: SDSN Chile

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

To launch the SDGs+10 report, SDSN Chile organized an online event that brought together over 50 participants from academia, civil society, and the private sector. Representatives from four member institutions presented analyses on SDGs 1, 4, 10, and 13, fostering cross-sectoral dialogue on Chile’s path toward 2030. The event reinforced SDSN Chile’s role as a convening platform that bridges research, policy, and implementation across universities, NGOs, business associations, and UN networks.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Mexico and the Mexican Secretary of Environment convened a workshop in August 2025 to gather contributions from academia for Mexico's updated Nationally Determined Contribution (NDC). The workshop is part of a deeper collaboration with the environmental authority to highlight the relevance of Mexican universities in advancing climate action across the country.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In June 2025, representatives of SDSN Mexico's Secretariat participated in the 2025 Sustainability Research and Innovation (SRI) Congress, which took place in Chicago, USA. During their participation in a dedicated panel, SDSN Mexico's Managers highlighted the network's successful multi-stakeholder partnerships throughout the years, which promote collaborative decision-making and community engagement. Additionally, the Network Co-Managers shared insights and outcomes from university-led initiatives on sustainability, social innovation, research, and climate action.

NETWORK MANAGERS

Karina Ruiz is Head of Strategic Engagement at the Direction of Sustainability and Social Impact at Tecnológico de Monterrey. In 2024, she was responsible for elaborating Tec's Sustainable Development Report, to showcase the institution's community with sustainability.

Edgar Leyva is the Technical Secretary at UNAM's Research and Development Secretariat, where he has played a key role in leading the funding strategy and the integration of University Programs, currently coordinated by the Research and Development Secretary.

62 students have participated in SDSN Youth Mexico's workshops on social innovation, partnerships and financing.

EDUCATION & SKILLS BUILDING

The Inter-institutional College on Climate Change (ICCC) was launched in April 2026, as a platform of high-level training programs focused on climate change, mainly for members of higher education institutions, but also open to representatives from other sectors. This initiative is led by Universidad Veracruzana and UNAM, and is sponsored by SDSN Mexico.

SDSN YOUTH MEXICO

SDSN Youth Mexico seeks to strengthen youth leadership through inter-generational dialogues and spaces to engage social innovation tools. In 2026, over 60 students from member institutions were trained in sustainable development and environmental issues. The presence of SDSN Mexico and SDSN Youth Mexico has strengthened through partnerships with different universities and key actors in the country and across Latin America, emerging as a leader in youth engagement for the SDGs.

SDSN YOUTH NETWORK COORDINATOR

Mariana Peña is Coordinator of Sustainable Development Initiatives at Tec de Monterrey and Network Coordinator of SDSN Youth Mexico at SDSN Mexico. She has been a youth activist for more than five years, driving action on topics such as climate change, environmental governance, and the sustainable development of cities and communities.

"It's clear that we need to refocus and reaffirm our efforts to leave no one behind, a principle that is fundamental to the achievement of sustainable development."

POLICY REFORM & EVIDENCE-BASED ADVOCACY

In 2025, TUSDG, the host of SDSN China Hub, completed an internal policy report on UN reform and submitted it to China's National Development and Reform Commission. Aligning with this, the Regional Science Academy Manifesto on Climate Change was released during COP30 in 2025. As a core participant, the network has actively advocated for accelerating sustainable development through integrated climate and SDG actions. This manifesto serves as a strategic roadmap for policymakers, emphasizing that regenerative and inclusive growth must be grounded in integrated climate-SDG frameworks to achieve systemic global transformation.

Capacity-building program for Brazilian civil servants. Credits: TUSDG

Organized over **20 academic events**, reaching over **1,000 participants**.

EDUCATION & SKILLS BUILDING

In 2025, a collaboration with the Brazilian National School of Public Administration (ENAP) led to the development of a capacity-building program for 25 senior civil servants from diverse ministries in Brazil. The program received Tsinghua's First Prize for Outstanding Training Program of the Year. Besides that, within the theme of skills building, SDSN China Hub has facilitated the representation of China in the 5th edition of the Universities for Goal 13 competition. TUSDG also organized its Greater China Competition (100 participants) and at the global finale, the honorable mention recognition was bestowed to one of the Chinese teams for their outstanding project.

Conducted thematic executive training programs for over **150 senior civil servants** from both domestic and international institutions.

NETWORK MANAGERS

Zheng Yi is Head of the Office of the Institute for Sustainable Development Goals of Tsinghua University, and researcher at the Geneva-Tsinghua Initiative, focusing on the role of universities in global governance and education on the SDGs. In 2025, she contributed to completing a policy report on UN reform and submitted it to the central government of China. She has also represented SDSN at the 8th China International Import Expo.

Peng Si is Program Manager of the Institute for Sustainable Development Goals of Tsinghua University. In 2025, she established strong international partnerships with the governments of Indonesia and Brazil on capacity-building programs for senior civil servants. The success of these programs helps the Indonesian and Brazilian governments accelerate the progress of digitalization and sustainable development.

"I gathered insights on topics such as youth climate action and nature-based solutions... I was truly inspired by this experience at COP30, which empowers me to drive changes for a sustainable future."

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Hong Kong hosted the Distinguished Lecture on Sustainable Development (DLSD) in July 2024 and June 2025, invited Professor Naoko Ishii and Professor Xuemei Bai, respectively, to share their insights on pressing global sustainability issues and strengthen global collaborations towards the 2030 Agenda. The Lecture held in 2025 was the first collaboration between SDSN Hong Kong and the Australian Consulate-General Hong Kong to expand the global reach of the network.

The SDG Forum Series has reached **over 500 people** since late 2024 in advancing the localization of the SDGs.

LOCAL IMPLEMENTATION & SCALING

SDSN Hong Kong has been co-organizing the SDG Forum Series since 2021 with the Office of University General Education, CUHK. During the reporting period, nine forums were held to bring participants from the public, academia, and private sectors, successfully driving localized actions toward the Sustainable Development Goals.

NETWORK MANAGER

Dr Ada Chan is Head of Communications and Engagement of Social Responsibility and Sustainable Development Office at The Chinese University of Hong Kong (CUHK). She successfully led initiatives focused on social impact and sustainability and established influential global networks for social impact. Prior to this, she also spearheaded community outreach projects pertaining to water sustainability at the University of Hong Kong.

SDSN YOUTH HONG KONG

In January 2026, a Post-COP30 Sharing Session was co-organized by the Social Responsibility and Sustainable Development Office at CUHK, the Jockey Club Museum of Climate Change, SDSN Hong Kong, and SDSN Youth Hong Kong. The event provided insights from CUHK student delegates in conversation with the Network Coordinator, Toby Lau. The discussion aimed to introduce the importance of youth engagement at international events such as COP and their critical role in driving climate action. The event concluded with two academic delegates presenting their perspectives on future research in climate action, and it encouraged attendees to collaborate in the pursuit of a sustainable future.

SDSN YOUTH NETWORK COORDINATOR

Passionate about promoting climate action and with experience in climate seminars, **Toby Lau** serves as a Steering Committee Member of the CUHK Jockey Club Museum of Climate Change (MoCC) and the 3rd MoCC Scholar. He is committed to sustainability governance and youth engagement, with professional experience in public administration, community development, and educational research.

Promoted multi-stakeholder inclusivity and critical perspectives at the HLPF and in the VNR.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

To shape the post-2030 Agenda, the Keio University-led "Beyond SDGs Project" is engaging diverse stakeholders in dialogues. As a key partner, SDSN Japan co-organized the domestic "Public-Private Forum on Beyond SDGs." Building on two successful domestic dialogues, this initiative was scaled to the larger Asia-Pacific region, hosting an ASEAN Workshop with regional stakeholders in April 2026. The initiative strengthened regional collaboration on the post-2030 Agenda by expanding multi-stakeholder dialogue from Japan to ASEAN, shaping shared pathways for sustainable development.

Multi-stakeholders discussing in Public-Private Forum Beyond SDGs. Credits: Beyond SDGs Initiative

NETWORK MANAGER

Rika Ikeda is a researcher at Keio University Global Research Institute (KGRI). She holds a PhD in Media Design from the Keio University Graduate School of Media Design, and specializes in sustainability, learning design using media technology, and social system design. She is particularly interested in designing learning environments for sustainable development in higher education.

Organized **three multi-stakeholder dialogues** across Japan and ASEAN on post-2030 sustainability priorities.

SDSN Kazakhstan

"As an SDSN Kazakhstan member, SDU strengthened its capacity to advance the SDGs. Hosting the 2025 SDSN Conference reinforced its role in dialogue and knowledge exchange, aligning its SDG Center with global practices and expanding national impact."

3rd SDSN Kazakhstan Conference, Partnership and Collaboration for a Sustainable Future.
Credits: SDSN Kazakhstan

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Kazakhstan advanced policy reform and SDG implementation through a set of interconnected initiatives, including the release of a policy brief assessing SDG progress and outlining recommendations for the post-2030 Agenda, and the presentation of its SDG Barometer project at an expanded meeting of the Parliamentary Commission under the Senate of the Republic of Kazakhstan on SDG monitoring. These efforts contributed to national policy uptake, with findings incorporated into Kazakhstan's 2025 Voluntary National Review (VNR). In parallel, the network engaged in the National Consultation on Integrated Policy Strategies for a Sustainable Future in April 2025, strengthening its role in national policy dialogue.

One policy brief, over 10 research articles, and two book chapters produced by Nazarbayev University Graduate School of Public Policy researchers on sustainability.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

On 16 May 2025, the 3rd SDSN Kazakhstan Conference was held at SDU University under the theme "Partnership and Cooperation in Building Sustainability and Sustainable Development." The conference convened experts and researchers from Germany, Kazakhstan, Kyrgyzstan, and Uzbekistan. Sessions covered SDG implementation, global partnerships, education, digital finance, inclusive growth, and governance. Key insights and policy recommendations were shared, and selected papers were published in the conference proceedings, contributing to ongoing SDG-related research and practice.

NETWORK MANAGER

Aida Kumarbayeva is an administrative staff member at the Graduate School of Public Policy at Nazarbayev University. She supports the operations of the local network, stakeholder engagement, and collaborations. She has research experience and an educational background in sustainable and local development.

Two major collaborations: SDGnexus project (DAAD) and the Science for Nature and People Partnership (SNAPP) working group.

SDSN YOUTH KAZAKHSTAN

SDSN Youth Kazakhstan addressed limited structured youth participation in sustainability and policy dialogue by co-organizing LCOY Kazakhstan 2024, strengthening youth representation in international agendas. A youth contest on regenerative culture, organized with the British Embassy in Kazakhstan and FAO Kazakhstan, facilitated dialogue and cross-sector engagement on sustainability issues. The EN-ROADS Climate Simulation Game introduced participants to climate negotiations, enhancing practical understanding of climate policy and decision-making processes.

SDSN YOUTH NETWORK COORDINATOR

Rabiga Akhmetova is the current Coordinator of SDSN Youth Kazakhstan. She is a senior student in the Department of Political Science and International Relations, a writing fellow, and a research enthusiast. This complements her dedication to bridging the gap between youth and sustainability.

Participated in the 2025 Seoul VLR and is officially partnering to shape South Korea's 2nd VNR for 2027.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

Through public-private partnerships, SDSN Korea advocated for the creation of a national Sustainable Development “Framework Act” in 2021. This policy reform legally mandates all levels of government to establish 20-year master plans and five-year implementation plans. Leveraging this systemic impact, in late 2024, the network hosted “Y-OWG (Youth-Open Working Group)” and “YLPP (Youth-Level Political Forum on SDGs)”. This initiative empowered youth to directly participate in the drafting of the “3rd Seoul Sustainable Development Master Plan (2025-2045) and Implementation Plan (2025-2029),” and the 2025 Seoul Voluntary Local Review (VLR).

Dong-Real KANG (Network Manager of SDSN Korea) discussing about the SDSN Korea ESD program with former UNESCO Director-General Irina Bokova. Credits: SDSN Korea

Over 400 participants engaged in intergenerational SDGs networking.

LOCAL IMPLEMENTATION & SCALING

SDSN Korea operates the “SDG Youth Hackathon & Living Lab.” It connects youth activists with marginalized residents to co-create grassroots solutions. The network partnered with the Seoul Metropolitan Office of Education in 2024, guiding 281 youth from 25 schools to develop 10 actionable solutions, which were subsequently showcased as best practices at the UNESCAP North-East Asia Multi-Stakeholder Forum on SDGs. This model was then scaled to Jinju City (five solutions by 22 students) and Seongbuk District (eight solutions by 39 students). In 2025, the Jinju program yielded eight solutions with 30 students participating.

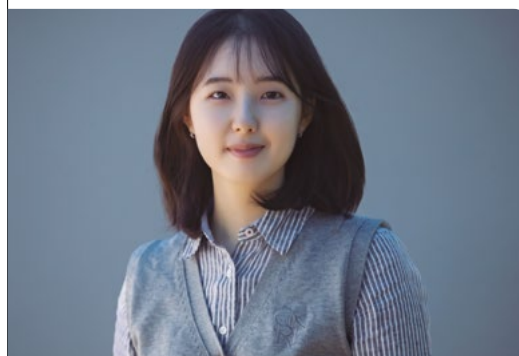

372 youth innovators engaged in the SDG Youth Hackathon & Living Lab, creating **31 actionable local SDGs solutions.**

NETWORK MANAGER

Dong-Real KANG is passionate about accelerating SDG policy implementation through youth capacity-building and empowerment. He developed the UNESCO ESD Official Project, Glocal Citizenship Training, which trains over 5,000 youth activists annually. More recently, he hosted the Youth-Level Political Forum on the SDGs (YLPP) as part of the 2025 Seoul Voluntary Local Review (VLR) process and Seoul's 3rd Sustainable Development Master Plan (2025-2045).

SDSN YOUTH KOREA

SDSN Youth Korea has reached thousands of youth and focused its work on bringing together 84 youth organizations from universities to annually publish the Voluntary Youth Review (VYR). Given its sustained policy advocacy efforts, it engaged on the advocacy campaign for the government to prepare its 2nd VNR ahead of the 2027 HLPF. The youth network also collaborates with stakeholders regionally, through monthly dialogues with youth from China, Japan, Mongolia, and Russia. This Northeast Asian coalition produces an annual Youth Statement and officially leads the Youth Session at the UNESCAP Multi-Stakeholder Forum on the SDGs.

SDSN YOUTH NETWORK COORDINATOR

Jin-won KIM works to educate, connect, and support youth groups to achieve the SDGs. Since 2023, she has been supporting various youth organizations across universities and campuses. She is also involved in the Local Community SDG Solutions project, showcasing cases of high-impact initiatives, and manages the SDGuys YouTube channel, leveraging technology to grow a new generation of SDG advocates.

The landmark ESD Pillar and Action Plan enables sustainability culture at scale in **10,230 public schools and involving 416,000 teachers.**

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Malaysia contributed to the milestone policy inclusion of Education for Sustainable Development in the ten-year Malaysia Education Blueprint. The inclusion represents the first instance of ESD appearing in any official Malaysian education policy. In the months leading up to launch of the Blueprint, SDSN Malaysia managers worked in tandem with the Ministry of Education to build a foundation for ESD implementation. An Action Plan to accelerate the ESD policy launched in mid-2026.

SDSN Malaysia Network Managers Karen Chand and Kong Phui Yi at the Malaysian Ministry of Education to conduct a special briefing on Education for Sustainable Development to its divisions. Credits: SDSN Malaysia

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Malaysia members contribute to scientific knowledge for biodiversity protection at the regional level and education transformation on the national level. University Kebangsaan Malaysia and University Sabah Malaysia academics contributed as cluster leads of the Science Panel for Borneo assessment report, an authoritative compendium for policy making. In the area of education, University Malaya and University of Nottingham Malaysia academics were appointed as advisors to the National ESD Strategic Partners Committee.

Public engagement on ESD across five geographic zones to over **155 ESD stakeholders** in the country.

Convening of an Executive Briefing on Education for Sustainable Development with the Malaysian Ministry of Education. Credit: Sunway Group Brand Marketing & Communications

NETWORK MANAGERS

Karen Chand actively contributes to the global effort to embed sustainable development across education systems. She works at the intersection of policy, teacher practice, and system reform, translating global agendas into scalable national strategies. Her background spans public sector reform, executive education, and strategy consulting, with a focus on operationalizing transformation.

Phui Yi Kong drives projects and thought leadership on Education for Sustainable Development in Malaysia. In 2025, she was one of the few non-governmental representatives invited to develop ESD's inclusion in Malaysia's Education Blueprint (2026 - 2035). Together with the Ministry of Education Malaysia, Phui Yi presented the policy pillar on learning environments as solutions labs supported by a central data and resource portal for bolstering ESD monitoring and support.

The network convened the Malaysian Education Ministry's highest officials on education's role in advancing sustainable development.

SDSN Pakistan

"The IGHD Annual Conference, organized by the Institute for Global Health and Development at Aga Khan University in collaboration with SDSN Pakistan, represents an important effort to connect research, policy dialogue, and practical action around Pakistan's climate and development priorities."

Dr. Bhutta, Network Chair, SDSN Pakistan

IGHD Annual Conference 2024, Credits: IGHD-AKU

Since late 2024, the network convened over **four webinars, reaching 200–300 participants** per session.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

As the host institution of and supported by SDSN Pakistan, Institute for Global Health and Development (IGHD) has advanced national dialogue on climate change, health, nutrition, agriculture, and sustainable development. Between fall 2024 and early 2026, IGHD convened key platforms, including webinars, the Annual Conference on Climate Change, Agriculture, Human Nutrition & Development in Pakistan, and SDSN Pakistan Leadership Council engagements, bringing together researchers, policymakers, development partners, and civil society to advance shared SDG priorities.

NETWORK MANAGER

Abbas Jaffer is the Communications Manager at the Institute for Global Health and Development, Aga Khan University. Actively involved in generating and disseminating SDG knowledge, he collaborates with the global network, fostering localized solutions. Abbas is dedicated to advancing sustainable development in Pakistan through effective problem-solving and implementation of the SDGs.

IGHD Field Trip Matiari 2025, Credits: IGHD-AKU

LOCAL IMPLEMENTATION & SCALING

The network supported IGHD in advancing field-based work on climate change, health, nutrition, and resilience in vulnerable communities across Pakistan, particularly in Sindh. Between late 2024 and early 2026, initiatives focused on heat adaptation, maternal and child health, environmental exposure, food systems, and climate vulnerability generated context-specific evidence from communities facing environmental and development challenges. This work supported data-driven decision-making, policy dialogue, institutional planning, and practical SDG implementation, while contributing locally informed approaches that can support universities, public-sector partners, development organizations, and SDSN member institutions working on climate resilience and sustainable development.

SDSN Philippines Roadshow convened over 100 stakeholders from government, academia, NGOs, youth, and the private sector.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Philippines conducted two regional roadshows in the Visayas and Luzon in October 2025 and April 2026, respectively, in partnership with member institutions, namely Iloilo State University of Fisheries Science and Technology and Ateneo de Naga University. The roadshows carried the theme, "Localizing SDG Solutions: Knowledge Partnerships for a Sustainable Future." The events convened participants from various sectors, including universities, government agencies, civil society organizations, youth groups, and the private sector, strengthening regional collaboration for SDG localization in the Philippines.

SDSN Philippines conducted a Membership Sustainability Screening of Beyond Zero: The Journey to Regenerative Business. Credits: Business for Sustainable Development

EDUCATION & SKILLS BUILDING

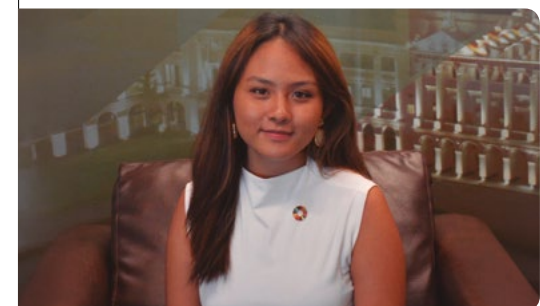

Business for Sustainable Development, in collaboration with SDSN Philippines and the network host institution, De La Salle University, organized a film screening and panel discussion event titled: "The Journey to Regenerative Business - Leadership and Vision in Corporate Sustainability". The film "Beyond Zero" showcases the life of Ray Anderson, the visionary founder of Interface. The screening and the discussion that ensued affirmed the network's aspiration to strengthen cross-sector dialogue on regenerative business.

NETWORK MANAGER

Antonio Carlos Maralit is a sustainability leader and environmental expert, currently serving as Executive Director of the University Sustainability Office at De La Salle University and Network Manager of SDSN Philippines. With over two decades of experience, he has led initiatives in campus sustainability, facilities management, and environmental education, including programs on carbon neutrality, ecological solid waste management, and large-scale reforestation.

SDSN YOUTH PHILIPPINES

SDSN Youth Philippines launched in 2025 to empower Filipino youth for sustainable development by engaging students and leaders. Since then, the youth network has successfully participated in the 1st Philippine Youth Convention for SDG Localization and the SDSN Philippines Roadshow. Their work is also focused on strengthening partnerships, as demonstrated in the national ASEAN Youth Month and the UP Youth Summit, while supporting capacity-building through leadership and SDG learning sessions in schools and communities to foster youth leadership and deepen SDG awareness. In 2026, it launched "Babae Ka, Period!" to promote women's rights through legal awareness and community empowerment.

SDSN YOUTH NETWORK COORDINATOR

As a young community development practitioner whose work centers on grassroots organizing, **Rafaella Villena** has facilitated community leadership and organizational development interventions with women's groups, urban poverty associations, transport workers, and social enterprises across the Philippines. Through research, field immersion, and community organizing, Rafaella has strengthened local organizations, advanced housing and women's rights, and amplified community-led solutions for sustainable development.

Advancing gender-responsive climate governance by elevating women's leadership and equity in decision-making.

 SDSN South Asia

 SDSN South Asia

 SDSN South Asia

EDUCATION & SKILLS BUILDING

Led by the host institution of SDSN South Asia and supported by the network, The Energy and Resources Institute, carried out initiatives such as Green Olympiad and Go4Youth. Strengthening environmental literacy and climate action of youth learners, at scale. These programs have fostered youth-led projects, teacher engagement, and institutional partnerships, creating a strong network effect. The model is scalable and replicable across regions, with expanding youth chapters and school networks.

Over **150,000 students** were engaged and **3,000 teachers** were trained.

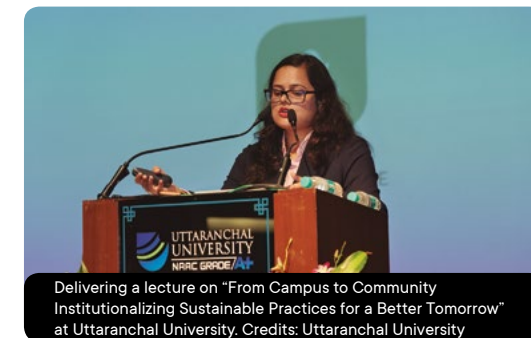

Delivering a lecture on "From Campus to Community: Institutionalizing Sustainable Practices for a Better Tomorrow" at Uttaranchal University. Credits: Uttaranchal University

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

On 4th August 2025, high-level convening brought together participants from the judiciary, academia, and policy sectors for a session on women's leadership in climate governance. The address highlighted women's significant yet undervalued role in agriculture and the informal economy, alongside persistent gender gaps in access to resources and decision-making. It emphasized the disproportionate impact of climate disasters on women and underscored the need for gender-responsive policies, improved representation, and stronger support for women as leaders in climate resilience.

NETWORK MANAGER

Vani Pandey currently serves as a Research Associate at the Centre for Resource Efficiency & Governance Division at TERI, New Delhi. She is a professional with around three years of experience in climate policy, sustainability, and circular economy research, and has been actively engaged in projects and campaigns addressing key environmental challenges. Her expertise spans comparative policy analysis, primary data collection, and multi-stakeholder engagement, with a strong track record of translating research into evidence-based recommendations for government, industry, and academic stakeholders.

SDSN YOUTH SOUTH ASIA

The SDSN Youth South Asia network works to ensure that environmental awareness among school students and youth is not fragmented and that there are platforms for sustained engagement. Through initiatives like the Youth Climate Conclave, they brought together 100 young people from across India to discuss and deliberate on the most pressing issues related to climate action. The initiative culminated in the Youth Pledge, a document co-created by all participants. Through their sustained work, their programs have fostered youth-led projects, teacher engagement, and institutional partnerships, creating a strong network effect. The model is scalable and replicable across regions, with expanding youth chapters and school networks.

SDSN YOUTH NETWORK COORDINATOR

Monmi Barua works to build the next generation of environmental changemakers as a Fellow in TERI's Education for Youth Empowerment Area of the Environment Education and Awareness Division. With over 12 years of professional experience working on projects and campaigns for youth on environmental and sustainability issues, Monmi has enhanced youth knowledge, facilitated networking, and driven behavioral change for long-term development through a myriad of awareness programs.

SDSN Southeast Asia

Since late 2024, the network has engaged over **6,000 participants** throughout all of its programs.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

On January 17, 2025, the Ministry of National Development Planning of Indonesia, UID Foundation, and SDSN Southeast Asia organized the SDGs Lecture 2025, “Indonesia in Global Challenges: Shaping a Sustainable Future” in Jakarta where more than 300 participants attended. During the event, Prof. Jeffrey Sachs, provided insights on Indonesia and development planning in a complex world. The lecture raised awareness on the increasing importance of integrated and long-term planning that utilizes technological developments, the urgency of regional integration, and the need for blended finance.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In October 2025 in Bali, the UID Foundation organized the Tri Hita Karana G20 Bali Global Blended Finance Alliance Dialogue. Under the theme of “Center of Future Knowledge: Sustainable AI for Our Common Future” it included 130 participants and was jointly hosted by the Tri Hita Karana Forum, the G20 Bali Global Blended Finance, UNDP, Pegasus Capital Advisors and Health Innovation Exchange (HIEx). The initiative brought together government officials, development agencies, technology companies, academia, and civil society organizations to focus on a shared goal: to foster AI-enabled sustainable development as a catalyst for inclusive socio-economic growth. This conference steered conversations towards ensuring that the benefits of the AI era are equitably shared while protecting the planet for future generations.

"SDSN Thailand has created a unique platform that brings science, policy, and society together, turning dialogue into actionable solutions for sustainable development."

POLICY REFORM & EVIDENCE-BASED ADVOCACY

Across Thailand, SDG implementation has faced challenges such as fragmented data, weak integration between research and policy, and limited inclusion of societal perspectives. SDSN Thailand has strengthened its role as a science-policy-society intermediary, advancing policy reform through evidence-based advocacy. Key contributions include policy-oriented research on a Just Energy Transition and support to Thailand's Voluntary National Review (VNR) through multi-stakeholder consultations and [participation at HLPF 2025](#).

Reached over **2,400 participants** through trainings and workshops, strengthening SDG capacity across sectors nationwide.

LOCAL IMPLEMENTATION & SCALING

SDSN Thailand has strengthened implementation of sustainable development policies through SDG localization and scaling mechanisms, including the Thailand Provincial SDG Index, an index created by the network to help provinces identify priorities and design targeted responses.

SDSN Thailand Public Forum convened **92 organizations**, advancing cross-sector policy dialogue across sectors.

NETWORK MANAGER

Nuntinee Malanon is Deputy Director of the Centre for SDG Research and Support (SDG Move) at Thammasat University. She advances the SDGs at the intersection of research, policy, and practice, while mobilizing universities and multi-stakeholder partnerships. Her work focuses on SDG localization, Education for Sustainable Development, and civic engagement, all to strengthen the role of universities as key actors in driving sustainable development in Thailand and the region.

Engaged more than **50 organizations** in food systems and over **30 organizations** in energy and volunteerism to drive SDG solutions.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Thailand has affirmed its role as a national convening platform, bringing together stakeholders across government, academia, civil society, and the private sector. Flagship initiatives include the [SDSN Thailand Public Forum 2025](#), held at the Ministry of Foreign Affairs, the [University Sustainability Study Tour 2025](#), and thematic dialogues on a Just Energy Transition and sustainable food and agriculture systems.

Across forums, workshops, and consultations, SDSN Thailand engaged over 1,000 participants, fostering multi-stakeholder coalitions and sustained collaboration. These platforms have strengthened partnerships, enabled knowledge exchange, and created a growing network effect to advance SDG action in Thailand.

University of Antwerp

SDSN Belgium

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In November 2025, SDSN Belgium celebrated the tenth anniversary of the National SDG Forum as one of the annual organizing partners alongside the Belgian Federal Institute of Sustainable Development. As the largest multi-stakeholder forum on the SDGs in the Benelux region, the Forum reaches a wide range of sectors and addresses a variety of themes. It provides policymakers, government bodies, businesses, NGOs, civil society, academia, and the private sector with an opportunity to meet and share SDG ideas and solutions.

SDSN Belgium-SDG Forum. Credits: SDG-Forum Belgium website

EDUCATION & SKILLS BUILDING

SDSN Belgium members actively organize sessions on peer learning networks, SDG ambassadorships, coaching, action learning days, and tailor-made and in-company trainings. They also organize seminars, webinars, workshops, e-learning, and guest and public lectures. Through these activities, they aim to reach as many people, organizations, and companies as possible in the most accessible way.

LONG-TERM SYSTEMS TRANSFORMATION

SDSN Belgium calculates the carbon footprint of the national SDG Forum by asking participants to provide information about their mode of transportation and how many kilometers they traveled. After mapping CO₂ emissions, the organization aims to offset and reduce them annually.

NETWORK MANAGERS

Inge Willems is the coordinator at the Institute of Environment and Sustainable Development of the University of Antwerp. She focuses on collaboration and results-oriented work. She monitors the progress of projects and supports the strategic objectives of the organization.

Dr. Jan Cools holds a PhD in Environmental Sciences and works as the Research Manager of the Institute of Environment and Sustainable Development at the University of Antwerp. He primarily focuses on inter-disciplinary projects related to integrated environmental management and climate change adaptation for a wide range of topics, including river basin management, coastal zone management, urban air quality and biodiversity. His projects typically integrate natural/engineering sciences with governance and social/economic sciences. Jan Cools has a proven track record in EU water and climate policy, and in EU project coordination. He is also vice-chair of SDSN Belgium.

"The Black Sea region faces a critical moment in SDG implementation. War and the energy crisis have disrupted economies, deepened inequalities, and slowed progress on key goals. Yet aligning recovery with the SDGs and strengthening regional cooperation can turn crisis into transformation."

SDSN Black Sea joins the NGIC-WAAS event in the XIII Global Baku Forum. Credits: SDSN Black Sea

By forging critical connections at five consecutive Global Baku Forums, SDSN Black Sea has successfully strengthened diplomatic and strategic regional relationships.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Black Sea published the [Black Sea Sustainable Development Report](#), which focuses on the Black Sea region and its countries' progress toward sustainability. Using data from the SDSN SDG Index, the report highlights the region's diverse challenges and achievements in pursuing the SDGs. It also contains policy recommendations and contributes to evidence-based policy advocacy in the region. The report will be updated in 2026 with the latest SDG Index data.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In October 2025, SDSN Black Sea hosted the 6th annual [Thessaloniki Sustainability Summit](#) under the theme "10 Years of the Paris Agreement," uniting scientists, policymakers, and youth. The conference was auspiced by the Aristotle University of Thessaloniki and the World Academy of Art and Science.

Under the ARSINOE project, **three international living labs** were organized, co-designing innovation pathways for the Black Sea.

NETWORK MANAGERS

Charis Stavridis is a professional civil engineer (MEng, MSc) specialized in and working on environmental and hydraulic projects. He is also a researcher and PhD candidate at the Aristotle University of Thessaloniki (AUTH). His research interests include sustainability and resilience in urban environments, citizen science, optimization techniques, AI, and machine learning.

Dr. Eleni Fotopoulou is a professional Civil Engineer working as Special Educational Staff at the Division of Hydraulics and Environmental Engineering and the Water Resources Engineering and Management Laboratory, of the Department of Civil Engineering at AUTH. She works on water resources management, protection and restoration of the environment, sustainable development, environmental impacts, and many other sectors.

SDSN YOUTH BLACK SEA

SDSN Youth Black Sea expanded its influence by leading an initiative on energy and sustainability, convening industry stakeholders to drive dialogue on carbon policy reform. Their flagship workshop assessed the capacity of national offices to implement European carbon legislation. Through interactive sessions and international conferences, the youth chapter focused on advancing decarbonization goals. 89% of youth participants reported increased knowledge, cementing the youth network's role as a catalyst for the energy transition and youth-led sustainable development.

SDSN Youth Black Sea and Ukraine's Council of Young Scientists co-published the first "Solutions for a Sustainable Black Sea" report, showcasing 12 innovative solutions for advancing the SDGs in the region.

SDSN YOUTH NETWORK COORDINATOR

Konstantinos Gkogkis is a Civil Engineering student at AUTH, who works to bridge the gap between technical infrastructure and environmental advocacy. With a record in youth leadership and event coordination, he is passionate about mobilizing communities for sustainable change. At his current role, Konstantinos is translating his local expertise into a global commitment to youth empowerment and a greener future.

SDSN Bulgaria

"I'm proud to participate in the Second Annual Conference of SDSN Bulgaria. As a member of the Advisory Council of the Azerbaijani Presidency of the UN Climate Summit, I promise you that whatever you discuss today, it will reach the forum in Baku."

Hosted by:

University of National and World Economy

SDSN Bulgaria

Around **100 students** have been trained in specific SDG-related subjects.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In 2025, SDSN Bulgaria and the University of National and World Economy (UNWE) hosted several international events addressing the SDGs, including the network's annual conference with vast participation from academia, leading business organizations, government, and local authorities. These events brought together participants across Europe, Africa, and North America.

SDSN Bulgaria Youth Official Launch. Credits: SDSN Youth Bulgaria

EDUCATION & SKILLS BUILDING

Through publications, lectures, and international events, SDSN Bulgaria promoted the significance of the SDGs and the pivotal role of young people, especially students, in achieving them. Some of these initiatives were incorporated into educational programs at the University of National and World Economy, including the Crisis Management and Sustainable Development course, which is part of the Master's degree program in National and Global Security.

NETWORK MANAGERS

Atanas Dimitrov is Associate Professor at University of National and World Economy and manager of SDSN Bulgaria. He advocates for the SDGs in the Bulgarian higher education system and for closer cooperation with regional partners.

SDSN YOUTH BULGARIA

The launch of SDSN Youth Bulgaria in the fall of 2024 was an important step towards empowering young people to achieve the SDGs. Soon after its establishment, in cooperation with the Foundation "Ecological Manifesto – ManEco," SDSN Youth Bulgaria held its first event - "Climate Mural and UN Climate Change Conference," the main goal of which was to promote the SDGs to students. During 2025, SDSN Youth Bulgaria participated in the main events organized by SDSN Bulgaria.

SDSN YOUTH NETWORK COORDINATOR

As an Environmental Legal Officer and law student at the University of National and World Economy, **Nikolay Boshnakov**, develops green legal innovations at the intersection of climate law, human rights, and youth policy. His work has earned three first-place prizes in European and Bulgarian legal competitions — including a recognized paper on the European Green Deal.

SDSN Bulgaria Second Annual Conference. Credits: SDSN Bulgaria

"SDSN's annual meeting illuminated a challenge we cannot ignore: transformative technologies like AI could, if wisely employed, genuinely accelerate the realization of the SDGs — perhaps even compensate for lost time."

Prof. Papanicolas, Network Chair, SDSN Cyprus

SDSN Cyprus

Hosted by:

Cyprus Research and Educational Foundation

SDSN Cyprus

SDSN Cyprus

SDSN Cyprus

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Cyprus supported evidence-based policy dialogue on climate resilience. It contributed to the public forum "Europe Must Learn to Live with Fire," held on 22 January 2026. The forum called for a shift from reactive fire suppression to proactive land-use management, prevention, early warning systems, ecological restoration, and climate adaptation. Also, the Climate Action conference on 8-9 April 2026 concluded with the Nicosia Call for Action 2026, a shared framework for regional climate resilience. It emphasized science diplomacy, open data, education, youth and women's empowerment.

Convened around **60 academics and administrators** at online meetings addressing the current state of the SDGs in Cyprus.

International Conference on "Climate Action in the Eastern Mediterranean and Middle East: Regional Cooperation Empowered by Science and Innovation, 8-9 April 2026. Credits: FOTOS KYPRIANOU

NETWORK MANAGERS

Stalo Gavrielidou is the Institute Affairs Coordinator at The Cyprus Institute (Cyl). Since joining Cyl in 2013, she has coordinated institutional initiatives, events, and projects, supporting SDSN Cyprus' work to mobilize members, strengthen collaboration, and mainstream the SDGs across Cyprus' research and education ecosystem.

Constantinos Kounnamas is Director of the Nature Conservation Unit at Frederick University. Through biodiversity conservation, natural resource management, environmental education, and more than 30 research projects, he advances practical sustainability work in Cyprus while connecting science, education, and youth engagement to the SDGs.

The network facilitated the adoption of the Nicosia Call for Action 2026, a shared framework for regional climate resilience.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

On 8-9 April 2026, the international conference "Climate Action in the Eastern Mediterranean and Middle East: Regional Cooperation Empowered by Science and Innovation" was held at the Filoxenia Conference Centre in Nicosia, organized by the Cyprus Presidency of the Council of the European Union. Through this process, SDSN Cyprus helped strengthen Cyprus' role as a regional hub for climate science and cooperation, connecting Europe with the Eastern Mediterranean and the Middle East.

Hosted by:

Charles University

SDSN Czechia

Karolinum, the historic seat of the Rectorate of Charles University. Credits: Charles University

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Czechia has moved from an emerging initiative toward the first stage of an active national network. Its main achievement has been laying the institutional foundations for sustainable development cooperation in Czechia. The network has begun identifying and engaging its initial member institutions and potential partners, laying the groundwork for future collaboration across academia, research, and practice.

In 2025, SDSN Czechia welcomed three new member institutions to its network.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Czechia invited 44 members of the Czech Rectors Conference, together with three non-profit organizations, to join the network.

NETWORK MANAGER

Eva Kupcová was appointed to manage SDSN Czechia at Charles University in January 2026. As a PhD candidate, she focuses on assessing the sustainability of food products. Beyond her research, she helps advance institutional initiatives that support more sustainable food systems in higher education.

Previously, Zuzana Trunečková managed SDSN Czechia until December 2025.

About **1,000 undergraduate students** per year completed the Ecological Macroeconomics class at KEDGE BS, embedding foundational sustainability competencies into business education.

La macroéconomie écologique...

Workshop on Financing for Sustainable Development, Dec. 2024.
Credits: Christophe Leroy

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

Looking ahead to November 2026, the Economic Commission of SDSN France will join forces with SDSN Benin to organize the 2nd edition of the Senior Policy on Sustainable Development in Cotonou on the theme: "Financial innovations and sustainable development: building a sustainable financing architecture". This event will discuss the new approaches to monetary and prudential policies put forth by the SDSN France network together with important stakeholders in the Global South. The best papers will be promoted through the publication of scientific articles and policy briefs for the benefit of decision-makers.

LONG-TERM SYSTEMS TRANSFORMATION

In December 2024, a seminar was held in Paris that brought together all the members of the SDSN France Economic Commission. The seminar synthesized the members' previous work into a new, unified approach to ecological macroeconomic policy. The commission's ecological macroeconomic model, Philia 1.0, was used to model policy prototypes. The Elgar Companion to Europe and the Sustainable Development Goals, edited by Guillaume Lafortune and Phoebe Koundouri, features key results.

The network's policy prototypes achieved publication in international peer-reviewed journals, validating local sustainability solutions through rigorous scientific expert evaluation.

LEAD OF THE SDSN FRANCE ECONOMICS AND FINANCE COMMISSION

Thomas Lagoarde-Ségot founded the Economics Commission of SDSN France in 2019, with a roadmap focusing on education and policy-oriented research. He is Professor of International Economics and Finance at KEDGE Business School. In 2024, he received the Financial Times Responsible Business Education award for the textbook Ecological Economics and Finance.

SDSN Germany

SDSN Germany

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Germany highlighted the strategic importance of spillover effects in government-led dialogue processes. The team raised awareness through publications and a position paper on the 2024 update of the German Sustainability Strategy (DNS). SDSN Germany also collaborated internationally on spillover effects, fostering an informal network that has been valuable for advising German policymakers. The network's strategic positioning contributed to the integration of spillover effects in the Transformation Team's report on International Responsibility and Cooperation and the revised DNS 2025.

HLPF roundtable on SDG 11 on 21 November 2025, Berlin, Credits: SDSN Germany

POLICY REFORM & EVIDENCE-BASED ADVOCACY

In 2024 and 2025, SDSN Germany contributed to Germany's third Voluntary National Review (VNR) 2025. The Annual Conference and the bi-annual Dialogue of Scientific Advisory Boards, co-organized by SDSN Germany in late 2024, served as platforms for policymakers to discuss the draft VNR and participation process with German stakeholders. SDSN Germany contributed position papers to the VNR in collaboration with other stakeholders, e.g. on negative spillover effects with Global Policy Forum Europe and VENRO. They are included in Germany's VNR webpage and selectively highlighted in the VNR itself.

HLPF roundtable on SDG 6 on 5 March 2026, Berlin, Credits: SDSN Germany

NETWORK MANAGER

Sarah Löpelt is Research Associate of the Science Platform Sustainability 2030 at the German Institute of Development and Sustainability (IDOS). In 2025 and early 2026, she organized, together with the network's Managing Director Dr. Axel Berger and former Network Manager, Franco Jauregui Fung, roundtables on SDGs 6, 7, 9 and 11 with experts from the German sustainable development community in preparation of the High-Level Political Forum on Sustainable Development (HLPF) 2026.

SDSN Germany integrated strategic spillover effects into the revised German Sustainability Strategy 2025 by fostering policymaker networks and publishing position papers.

SDSN Greece

The SDG4U project equipped over **400 students** with practical sustainability skills, embedding an actionable SDG mapping methodology across partner universities.

EDUCATION & SKILLS BUILDING

Through the collaboration between SDSN Greece and the Ages of Globalization initiative within the ARSINOE project, a global partnership for education on sustainability and climate resilience has been developed, connecting international research networks with educators and learners in Greece. This collaboration has created a space for Greek learners and educators to engage with global sustainability debates and resources while also acting as a multiplier for the educational outputs of the ARSINOE project.

Embedded climate resilience research into the Greek educational ecosystem by codeveloping and delivering **28 sustainability lessons** within the Ages Globalization initiative.

SDSN YOUTH GREECE

The SDSN Youth Greece network tackled the lack of student voices in university sustainability governance and the gap in accessible, youth-centered sustainability education by launching a three-day webinar series on sustainability's social dimensions, producing expert video content and addressing the overlooked link between sustainability and mental health. Their work focused on examining the effectiveness of proposed sustainability goals for the university, resulting in a comprehensive report from the Youth team to the university's senior management.

SDSN YOUTH NETWORK COORDINATOR

Alexandros Kaminas serves as SDSN Youth Coordinator in Greece. He is a marine ecologist passionate about sustainability, youth engagement, and science communication. His research focuses on climate change, overfishing, and biodiversity loss in Mediterranean ecosystems. With experience supporting initiatives promoting the SDGs in higher education and contributing to outreach, research, and event coordination, his portfolio spans international collaboration, mathematical modeling, and environmental advocacy.

NETWORK MANAGERS

Dr. Dimitris Raptis is a Physicist with a PhD in Chemical Engineering and six years of postdoctoral research experience in the UK and Spain. He specializes in nanomaterials, renewable energy technologies, and sustainable energy research and development. Currently, he serves as the Proposals Coordinator at AE4RIA, actively engaged in various research and industrial projects, with extensive experience in project management and grant writing. Dimitris concluded his position as Network Manager in June 2026.

Dr. Antonios Alevizos is Adjunct Lecturer and Researcher at the National and Kapodistrian University of Athens. Through his teaching, research, and network leadership, he advances the social dimensions of sustainable development, connects academic institutions with SDG action, and promotes dialogue on social inequality, sustainability, business responsibility, and inclusive transformation.

SDSN Ireland an All-Island Network

"The network works actively with the Irish Government and local authorities to promote teaching and research on sustainable development in HEIs across the island. It also supports multi-stakeholder collaborations to increase public visibility and SDG impacts."

Ambassador David Donoghue, SDSN Ireland Leadership Council member

Hosted by:

-  University College Cork
-  Queen's University Belfast
-  SDSN Ireland (an All-Island network)
-  SDSN Ireland (an All-Island network)
-  SDSN Ireland (an All-Island network)
-  SDSN Ireland (an All-Island network)

Contributed to Ireland's Third National SDG Implementation Plan, participated in OECD consultations on policy coherence for sustainable development, and presented to Ireland's National SDG Stakeholder Forum on Voluntary Local Reviews.

SDSN Ireland Leadership Council session with SDSN President Jeffrey Sachs and Vice President Maria Cortés-Puch on 4 March 2026 at National Universities of Ireland offices in Dublin. Credits: University College Cork

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Ireland has produced policy briefs, consultation submissions, and analytical reports designed to inform national decision-making processes. The network supported the development and dissemination of analytical tools and indicators to track SDG progress with high geo-spatial resolution, enabling policymakers and stakeholders to better understand gaps and opportunities while identifying communities in risk of being left behind. A key impact of this work was the strengthening of data-informed policymaking, and the network was identified as an SDG Champion by the Government of Ireland.

Findings of the high-resolution geo-spatial tools for tracking localized SDG progress were presented to Chief Executives at the All-Island Local Authority Forum in collaboration with Co-operation Ireland.

NETWORK MANAGER

John Barimo is a coastal ecologist with a transdisciplinary focus on sustainability and holds a doctorate from University of Miami, USA. He has prior experience within industry, government agencies, and NGOs and is an advocate of multi-stakeholder engagement and engaged research. He has a keen interest in curriculum (re)design for sustainability especially with regards to socio-ecological transitions.

Opening remarks of the Reach'24 Arts and Sustainability Festival by Prof. Michael Alcorn, Deputy Co-Chair of SDSN Ireland. Event was held at Queen's University Belfast, Northern Ireland. Credits: SDSN Ireland

SDSN YOUTH IRELAND

With the launch of SDSN Youth Ireland in 2026, students from four member institutions have envisioned structures and areas of focus that will allow the youth network to equip youth with the skills, knowledge, and abilities needed to contribute to sustainable development. The planned working themes include AI in education, healthy and sustainable consumption, and collective climate action, and they will implement initiatives on these themes throughout 2026.

SDSN YOUTH NETWORK COORDINATOR

Mórrihan McEvoy advocates for Accessible Education as the Student Officer at Queen's University Belfast. She is incredibly passionate about fighting against climate change. In 2025, Mórrihan provided volunteering opportunities for QUB students focused on waste reduction in the local area and has made strides to improve organizational accountability for sustainability across QUB and its external partners.

SDSN Italy

SDSN Italy organized or contributed to **10 events** related to sustainable development, reaching over **600 people**, and also endorsed 3 additional events.

SDSN Italy

SDSN Italy

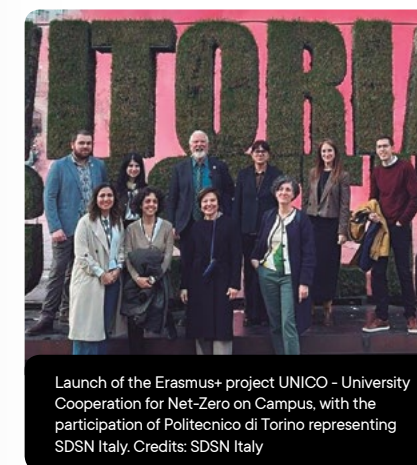

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

The network strengthened multi-stakeholder collaboration through 10 events and thematic dialogues, some within the Italian Festival of Sustainable Development 2025, engaging citizens, academics, and students. These initiatives reduced fragmentation across academia, institutions, and civil society, while expanding partnerships with ASviS, RUS, the National Research Council of Italy, and the United Nations Global Compact. The network also promoted knowledge transfer and local impact by linking research, policy, and community action, further reinforced through SDSN Italy's engagement in COP30.

EDUCATION & SKILLS BUILDING

At Politecnico di Torino, SDG learning outcomes have been integrated into a structured portfolio of interdisciplinary and sustainability-oriented courses, training over 6,000 students annually. This direction was reinforced through the co-organized kick-off meeting of the national PhD Program in Sustainable Development and Climate Change, involving 250+ PhD students from 40 Italian universities. Since 2025, the University of Brescia has also offered a doctoral course dedicated to the 2030 Agenda and its monitoring across territorial scales.

Four events engaged **200 students** across school levels, while SDG courses involved **over 6,000 university students**.

Launch of the Erasmus+ project UNICO - University Cooperation for Net-Zero on Campus, with the participation of Politecnico di Torino representing SDSN Italy. Credits: SDSN Italy

Festival of Sustainable Development 2025 by ASviS Italia where SDSN Italy hosted events at Politecnico di Torino and Università di Brescia focused on Circular Design, Mountains and Climate Change, and Energy Care. Credits: SDSN Italy

SDSN YOUTH ITALY

To ensure youth are formally engaged and to overcome barriers to broader participation, SDSN Youth Italy was launched in 2025. The mission of the youth network will be to adopt an inter-generational approach, ensuring that youth are equipped with skills and prepared to contribute to sustainable development.

SDSN YOUTH NETWORK COORDINATOR

Lorenzo Urbanetto as a Chemistry student at the University of Parma with a deep belief that science and civic engagement go hand in hand, Lorenzo Urbanetto is a strong advocate for digital sovereignty, actively promoting Free and Open-Source Software (FOSS) in science education to make tools more accessible and ethical. At university, he helped develop a chemistry video game and guided high school students in STEM. Outside the lab, he has worked to contribute to several projects by gaining local grants to tackle e-waste, fight planned obsolescence, promote digital ethics, and use tinkering to bring sustainability and energy awareness to young people, all while fighting social isolation.

NETWORK MANAGERS

Sara Torabi is an Associate Professor at the Politecnico di Torino, Department of Environment, Land and Infrastructure Engineering, specializing in sustainable, digital, inclusive and green cities. She leads national and European research projects and supports public and private sectors in advancing SDGs. An author of numerous publications, her research focuses on co-design, circular planning, Nature-Based Solutions, KPIs, and participatory decision-making methods.

Anna Richiedei is Associate Professor of Urban and Regional Planning at the Università di Brescia. She leads and contributes to research projects on spatial planning, sustainability, and the 2030 Agenda, promoting the integration of policies, data, and territories. Through academic work and stakeholder engagement, she advances sustainable urban strategies and participatory processes for more resilient communities.

SDSN Italy participated in COP30 in Belém, with the network co-chair contributing to the global climate debate.

SDSN Kuwait

Hosted by:

 Gulf University for Science and Technology

 SDSN Kuwait

 SDSN Kuwait

POLICY REFORM & EVIDENCE-BASED ADVOCACY

The network has produced over 15 publications for academic, policy, and general audiences, addressing key sustainability challenges including resilient workplaces, ESG integration, gender equality, green finance, food waste, energy use, pollution, and social development. Each output provides actionable recommendations aligned with the SDGs, strengthening the role of SDSN Kuwait in advancing applied research and policy-relevant sustainability solutions across the region.

SDSN Kuwait supporting discussions on AI in food systems. Credits: SDSN Kuwait

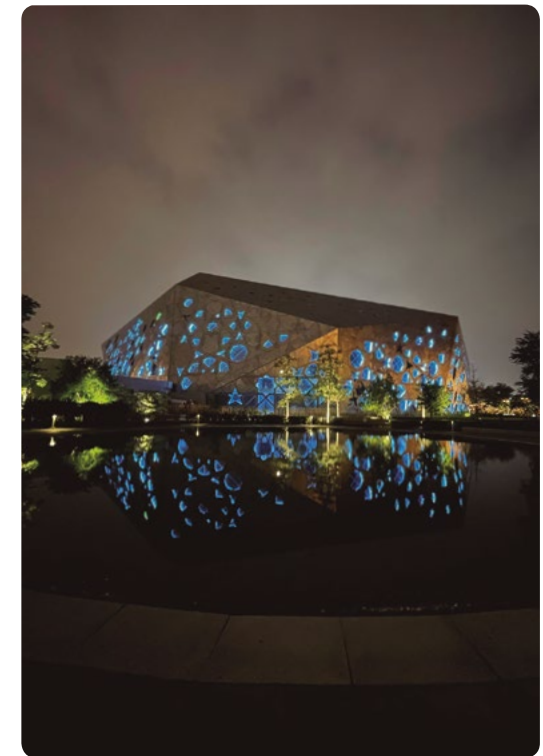

16 publications shared on LinkedIn generating over **25,000 impressions** and re-shared by many engaged readers.

EDUCATION & SKILLS BUILDING

SDSN Kuwait is strengthening sustainability education and youth engagement through seminars and workshops on emerging topics such as artificial intelligence and its role in addressing SDG challenges, including applications in food systems. It is also working with academic committees at GUST to embed the SDGs into university curricula by aligning course learning outcomes with global targets. These efforts integrate sustainability into learning and empower students to actively contribute to a more sustainable future.

NETWORK MANAGER

Dr. Fida Karam is an Associate Professor of Economics at Gulf University for Science and Technology. She coordinates with academic departments to produce high-impact policy briefs that inform decision-making, and drive student-led sustainability initiatives that translate ideas into real-world impact.

Strengthened sustainability learning through targeted seminars and workshops on emerging technologies, linking artificial intelligence and SDG solutions to applied student engagement.

SDSN Netherlands

"It was valuable to bring together academic and industry perspectives on regenerative leadership in one shared dialogue space."

Participant, First International Regenerative Business Leaders Conference, March 2025

SDSN Netherlands Team. Credits: SDSN Netherlands

Over 2,200 students, staff, and alumni engaged through the Déjà VU program supporting the launch of SDSN Netherlands.

LONG-TERM SYSTEMS TRANSFORMATION

Vrije Universiteit Amsterdam contributed to long-term systems transformation through an SDG Academy session on fossil-free research partnerships within SDSN Netherlands activities. The session examined VU's decision to discontinue collaborations with fossil fuel companies not aligned with the Paris Agreement. As one of the first universities globally to adopt such a framework, the initiative provides a replicable model for aligning academic research governance with climate transition pathways across Dutch universities.

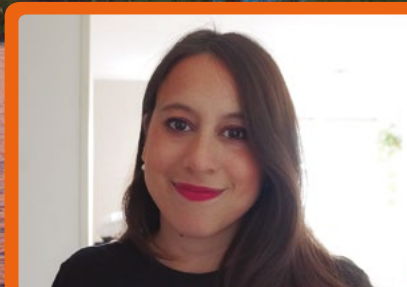

EDUCATION & SKILLS BUILDING

In March 2025, SDSN Netherlands contributed to education and skills building through a national workshop on the Netherlands' international SDG spillover effects, based on SDSN's SDG Index findings. The workshop brought together researchers and institutions working with datasets from CBS, OECD, SDSN, and government sources to improve the understanding of cross-border impacts of Dutch policies and explore alignment of indicator frameworks, supporting the development of a shared dashboard for future monitoring and evidence-based policymaking.

64 participants joined a workshop on SDG spillover effects supporting alignment of national indicator frameworks.

NETWORK MANAGER

Gisela Garrido Veron coordinates SDSN Netherlands, where she supports collaboration between universities, policymakers and practitioners to advance the implementation of the SDGs. Based at VU Amsterdam she has experience in EU-funded projects, international cooperation and urban sustainability transitions, and holds a double MSc in Public Policy and Human Development from UNU-MERIT. Gisela concluded her position as Network Manager in July 2026.

164 stakeholders from academia, policy, civil society, and youth organizations joined the Summit for Future Generations in June 2025.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Netherlands contributed to multi-stakeholder coalition building as a track sponsor of the Regenerative Business Leaders international conference (March 2026), convened by Vrije Universiteit Amsterdam together with academic institutions, businesses, and innovation platforms. The event brought together researchers, practitioners, and sustainability leaders to explore regenerative economic models and leadership approaches supporting systemic transitions beyond extractive growth paradigms. Discussions addressed applications ranging from regenerative agriculture and circular production to governance innovation and Doughnut Economics frameworks. The conference launched the Regenerative Business Leaders initiative and connected SDSN Netherlands to a growing interdisciplinary network of over 500 academics and practitioners working on regenerative transition pathways.

The Nordic Sustainable Development report prompted reflections and dialogue with the Nordic Council of Ministers.

DATA-DRIVEN DECISION-MAKING

In December 2025, the first Nordic Sustainable Development Report was launched. It shows that the Nordic countries perform well for social and economic SDGs and on Leave No One Behind. However, progress has stagnated and the Nordics have significant challenges related to responsible consumption, environmental pressures, and negative spillovers. The report also compares these results to the sustainability reporting from the Nordic Council of Ministers, and the findings have been presented to working groups within the Nordic Council of Ministers, contributing to ongoing policy discussions.

Nordic Nature-Based Solutions Conference. Credits: Nina Silow

LONG-TERM SYSTEMS TRANSFORMATION

The Mistra Carbon Exit research program analyzed the technical, economic, and political challenges to achieve net-zero greenhouse gas emissions in Sweden. To identify synergies and tradeoffs between climate mitigation actions and the SDGs, the SDSN Northern Europe secretariat made SDG impact assessments on large-scale implementation of seven key technologies to achieve net-zero emissions. The findings were published in early 2026 and can support policymakers and provide a basis for industry in long-term technology choices and business model development, both in Sweden and elsewhere.

NETWORK MANAGER

Martin Eriksson is a project leader and researcher with expertise in environmental and sustainability science based at the hosting organization Wexus, a collaboration hub for sustainable development between the University of Gothenburg, Chalmers University of Technology, and University West. His work centers on mobilizing universities as key actors in sustainable development, strengthening inter- and trans-disciplinary approaches, and supporting organizations in conducting holistic SDG impact assessments.

Since October 2024, **six member meetings with 175 participants** have advanced collaboration on sustainable development.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

Chalmers University of Technology, one of the two hosts of SDSN Northern Europe, was selected to participate in the 5th edition of the Universities for Goal 13 student competition. This competition is a collaboration with Siemens Energy, where students from nine renowned universities worldwide develop innovative solutions to combat climate change and its impacts.

"For Guimarães, as the European Green Capital, and for cities more broadly, UNIMUNICIPIOS translates local sustainability challenges into sciencebased solutions, strengthening the link with academia while directly informing public policies and accelerating SDG implementation on the ground."

SDSN Portugal Steering Committee. Credits: SDSN Portugal

LOCAL IMPLEMENTATION & SCALING

SDSN Portugal has promoted the UNIMUNICIPIOS project. The objective is to establish collaborative teams comprising Master's students and municipal representatives. These teams research and develop theses that address the challenges municipalities face in achieving SDG targets. In the current pilot phase, two higher education institutions and three municipalities are participating. The regional authority will award the two best student theses from each municipality. Negotiations are underway for an extension of the project throughout Portugal and in Portuguese-speaking countries in Africa, through universities in Mozambique, São Tomé e Príncipe, and Cabo Verde.

Through CAPP-ODS, SDSN Portugal institutionalized a scalable civil service framework, establishing a roadmap to embed SDG implementation skills across public administrations nationally.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

On 19 June 2026, SDSN Portugal, in collaboration with the Energy Agency (ADENE), ODSlocal, and the City of Porto, organized their annual conference, under the theme "A Territorial Approach to the SDGs." SDSN Portugal partnered with the Open University to moderate a workshop on universities' contributions to SDG implementation and with the University of Trás-os-Montes and Alto Douro (UTAD) to establish a FABLE Portugal team comprising three universities.

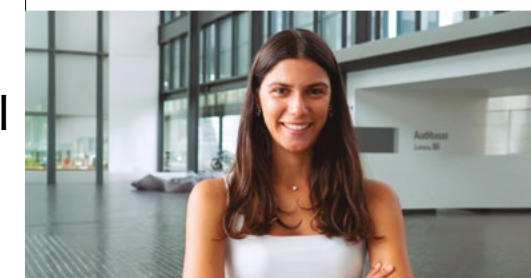

NETWORK MANAGER

Maria João Filgueiras Rauch is a diplom-Engineer and current Executive Vice-President of SDSN Portugal. She is a qualified program and project evaluator and local development expert with over 20 years of experience in integrated socio-economic development, labor markets, and social policies. Her career includes working for the Portuguese Ministry of Labor and Social Solidarity—where she was Director of Studies and Organization and helped design ESF Operational Programs (1989–1999)—and serving as an independent consultant in Germany.

The UNIMUNICIPIOS project bridged higher education and municipalities, providing scalable, real-world solutions to local sustainable development challenges in **3 Portuguese cities.**

SDSN YOUTH PORTUGAL

The SDSN Youth Portugal network launched in June 2026, during SDSN Portugal's annual conference. To lay the groundwork, a youth workshop was organized in February 2025 to design a work plan. Over the next few months, the youth network will focus on empowering and mobilizing Portuguese youth to involve them in developing solutions for sustainable development.

SDSN YOUTH NETWORK COORDINATOR

Mar Mateus da Costa is a Medical Resident in Public Health based in Lisbon, Portugal. Motivated by the potential to improve people's lives, she is particularly interested in public policy that integrates health, education, social development, the economy, and the environment to create lasting and equitable change. Since her college years, Mar has been actively involved in youth organizations, advocating for young people at local, national, and international levels, and she's now doing it as part of SDSN Youth Portugal. She is committed to advancing evidence-informed policy, multi-level collaborations, and inclusive leadership to build healthier, more resilient societies.

SDSN Romania

Hosted by:

 Bucharest University of Economic Studies

 SDSN Romania

 SDSN Romania

LONG-TERM SYSTEMS TRANSFORMATION

In the context of long-term systems transformation, ASE joined the UNICO (University Cooperation for Net Zero on Campus) project aiming to accelerate the transition of European universities toward net-zero emissions. It is a flagship initiative that formalized the university's commitment to decarbonization. As the hub for SDSN Romania, ASE uses the findings from the UNICO project to guide other Romanian universities, acting as a "national coach" for academic decarbonization.

246 experts in sustainable development were trained in 2025.

EDUCATION & SKILLS BUILDING

In 2025, SDSN Romania's host institution, ASE, developed a National Training Program for Experts in Sustainable Development. In collaboration with other partner universities, a new cohort of experts from the Southeast Region of Romania was trained. Additionally, ASE was the first Romanian university to create and offer a specialized post-graduate program titled "Expert in Sustainable Development".

The entire university community has been involved in the transition process toward net-zero emissions as part of the UNICO project framework.

NETWORK MANAGER

Elena Preda is the Director of the Research Centre for Sustainable Development at the Bucharest University of Economic Studies (ASE). She is a Ph.D. Senior Lecturer and expert in systems ecology. She has been responsible for transitioning SDSN Romania from a recently launched network, in 2024, into an operational entity by boosting regional collaboration, developing knowledge, and educating students for the green transition. Within SDSN Romania she also leads ASE's participation in the EU-funded UNICO project and the SDSN's Universities for Goal 13 global competition.

EDUCATION & SKILLS BUILDING

SDSN Romania has been part of the Universities for Goal 13 Competition since 2024, supporting student innovation in addressing climate and energy challenges.

Universidad Autónoma de Madrid

 SDSN Spain

 SDSN Spain

 SDSN Spain

 SDSN Spain

The network synthesized **145 stakeholder inputs** across four national challenges, embedding regional priorities into Spain's 2030 Sustainable Development Strategy.

POLICY REFORM & EVIDENCE-BASED ADVOCACY

SDSN Spain steered stakeholder consultations to reshape Spain's Sustainable Development Strategy (EDS) 2030, under an agreement with the Ministry for the 2030 Agenda. Leveraging insights from the 3rd Voluntary National Review, REDS-SDSN Spain chaired the high-level working group on territorial cohesion and climate. This targeted mobilization successfully injected critical sub-national priorities into the final 2030 Strategy adopted in February 2026, positioning the network as a pivotal institutional architect of Spain's national sustainability policy.

LOCAL IMPLEMENTATION & SCALING

UNICITIES 2030 is an ongoing project that supports cities and municipalities on their path towards sustainability, connecting academic knowledge with the practical needs of local administrations. Key challenges are defined through a co-creation process, after which students develop final projects with support from the university, the city council, and REDS-SDSN Spain. action toward shared sustainability goals.

NETWORK MANAGER

Marta Ares is the managing director of the Spanish Network for Sustainable Development (REDS Association), host of SDSN Spain, and an expert in public policy and international cooperation. She has extensive experience working with public institutions, private organizations, and civil society. Before joining the network, she served as director of the Basque Agency for International Cooperation and as a development coordinator at ISGlobal.

SDSN YOUTH SPAIN

Established in 2026, SDSN Youth Spain will build on the "Youth 2030" initiative promoted by REDS-SDSN Spain. It aims to empower young people as primary agents of sustainable development through participatory workshops and to have youth co-design an innovative, peer-to-peer communication campaign. Originally disseminated across social networks to amplify youth perspectives, the initiative expanded into a dedicated podcast episode to reach broader audiences. By shifting youth from passive consumers to active narrative creators, the project established an authentic, peer-led advocacy model that counters sustainability fatigue and repositions the SDGs through the lens of the next generation.

SDSN YOUTH NETWORK COORDINATORS

Carla del Campo advocates for youth engagement and leads government relations at REDS Association. Driven by a desire to understand social relationships that shape our societies, she has shaped the strategic focus on youth engagement while strengthening relationships with local governments.

Silvia Moratinos is an environmental professional specialized in sustainability, circular economy, and waste management. With degrees in Environmental Sciences and Geography, she has developed her career through environmental consulting, education, sustainability-focused initiatives, and collaborations to promote sustainable development.

"#AvenirAlimentaire acts as an accelerator—bringing stakeholders together, raising awareness, and delivering concrete results for sustainable agriculture and healthy diets."

LOCAL IMPLEMENTATION & SCALING

SDSN Switzerland launched #AvenirAlimentaire, Switzerland's first co-created, science-based implementation process for transforming the national food system. Building on the momentum of the 1st Swiss Food System Summit, the initiative engaged over 250 stakeholders from across the food value chain and integrated them into the process. Through the Collective Action Project (CAP) Fund and several co-creation events eight collaborative projects were developed and over CHF one million mobilized for food system transformation – addressing areas such as food waste reduction, agricultural soil health, and food environments.

SDSN Switzerland maintained high community engagement through its e-newsletter, securing a **55% open rate** across three editions to consistently inform over **1,300 recipients**.

SDSN Türkiye convened over **60 universities and hundreds of stakeholders**, strengthening institutional collaboration through targeted member meetings and climate-focused COP31 webinars.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

SDSN Türkiye convened more than 60 member universities and partners from government, business, civil society, and K-12 schools through four Members and Stakeholders Meetings and two COP30-to-COP31 webinars. These events engaged hundreds of participants, including the Climate Change Presidency, the Ministry of Trade, the EU Mission to Türkiye, development banks, business leaders, academics, and teachers. By connecting communities, SDSN Türkiye fostered dialogue on the green, digital, and human-centered skills needed for Türkiye's sustainable transformation and inspired new partnerships.

EDUCATION & SKILLS BUILDING

SDSN Türkiye advanced education for sustainable development through university courses, teacher trainings, and national outreach. Through Global Schools and Teachers 2030 programs, more than 1,000 educators integrated sustainability, climate awareness, democracy, and global citizenship into their teaching. In partnership with the Zero Waste Foundation, over 100 high school students received hands-on training, while youth, university, and corporate programs reached thousands of students and professionals across Türkiye, building skills for the country's sustainable transformation.

NETWORK MANAGER

Dr. Bahar Özay mobilizes academia, public and private sector institutions, and civil society partners to advance education and practical solutions for the SDGs at SDSN Türkiye. At Boğaziçi University and within SDSN Türkiye, she develops and teaches programs on sustainable development, sustainable finance, and education for sustainable development, while strengthening evidence-based policy dialogue, partnerships, and international cooperation in support of climate action and Türkiye's preparations for COP31.

Teachers 2030 and Global Schools enabled more than **1,000 educators** to integrate sustainability, democracy, and global citizenship.

SDSN YOUTH TÜRKİYE

SDSN Youth Türkiye expanded its reach across university hubs, engaging more than 130 students through new student initiatives and collaborations nationwide. Workshops, expert talks, field visits, and international dialogues addressed circular economy, sustainable finance, and social innovation. These activities strengthened peer learning, inspired new partnerships, and created a scalable student-led platform for sustainability advocacy across Türkiye.

SDSN YOUTH NETWORK COORDINATOR

Alp Eren Zeybek is deeply passionate about creating sustainable communities for ourselves and future generations, as the pressing issues facing our world are prompting us to focus more on sustainability. His work focuses on coordinating actions to achieve these goals, bringing together university students in Türkiye through projects aimed at raising awareness.

SDSN United Kingdom

"SDSN UK is driving practical, evidencebased solutions to the SDGs. By partnering with UN Global Compact UK, we're combining academic insight with business leadership to accelerate progress on the most pressing challenges facing society."

University College London (UCL)

SDSN United Kingdom

SDSN United Kingdom

EDUCATION & SKILLS BUILDING

SDSN UK has been part of the Universities for Goal 13 initiative since 2024, supporting student innovation in addressing climate and energy challenges. In the 2024 edition, a team from the University of Southampton reached the global finale with a low-cost hydroponic food system that addresses SDGs 2, 12 and 13. This momentum continued in 2025 when UCL students reached the final with a project that repurposed micro fulfillment hubs as community food centers. Both teams presented their ideas to an international jury, thus gaining global visibility.

QS Insights recognizes SDSN UK's SDG Reactor for its innovative role in connecting academia and business.

Students from the University of Southampton who took part in SDSN's Universities for Goal 13 competition in 2024. Credits: SDSN United Kingdom

LOCAL IMPLEMENTATION & SCALING

In October 2025, UCL, as host of SDSN UK, launched the SDG Reactor, supported by UKRI's Higher Education Innovation Fund. Bringing together the SDSN UK network of over 20 universities and the UN Global Compact Network UK's 1,000-strong business community, the Reactor fosters cross-sector collaboration to accelerate SDG progress. Recognized by QS Insights for bridging academia and business, the initiative will expand through a series of collaborative engagement activities, including a UK-wide SDG Roadshow with UNGC UK, supporting place-based action and stronger academic-business partnerships.

NETWORK MANAGER

Sasha St John Moreau is the Head of Education and Student Experience and the Sustainable Development Goals (SDGs) at University College London (UCL). She joined the SDSN UK as a Network Manager in May 2026, following the retirement of the previous network manager, Simon Knowles, who played a key role in setting up the Universities for SDG 13 project in the UK.

SDG Reactor connects SDSN UK's **20 universities** with the UN Global Compact Network UK's **1,000-strong business community**.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

In February 2026, the SDG Reactor - a SDSN UK partnership with UN Global Compact UK - worked alongside Ethical Screening to convene a cross sector group of researchers, investors and sustainability practitioners for a workshop on the future of SDG-aligned investing. Expertise from the SDSN network, including Exeter University's Exeter Sustainable Finance (ESF) Centre and UCL's Centre for Sustainable Business (School of Management) was mobilized. The workshop explored how SDG frameworks are applied and misapplied in investment analysis and capital allocation. Insights, shared in a recent blog, highlighted the value of methodological rigor, greater transparency, and opportunities for stronger collaboration between academia and sustainable finance to co-develop robust and credible assessment tools.

Professor Gail Taylor, Chair of the SDSN United Kingdom, and Professor Jeffrey Sachs, with UCL participants of the Universities for Goal 13 competition. Credits: SDSN United Kingdom

SDSN Western Balkans

Over **100 participants** convened to advance SDG-aligned dialogue on energy transition, investment, and regional cooperation.

€1.2 billion renewable energy initiative by Balkan Energy Holdings, showcased as a scalable clean energy model for the Western Balkans.

LONG-TERM SYSTEMS TRANSFORMATION

Through the Economic Forum, SDSN Western Balkans contributed to long-term systems transformation by promoting dialogue on renewable energy, decarbonization and sustainable investment. The announced renewable energy project in BiH, with potential expansion across the Western Balkans, demonstrated how large-scale clean energy initiatives can support energy transition, regional development and alignment with the SDGs and EU Green Deal objectives.

CONVENING AND MULTI-STAKEHOLDER COLLABORATION

On 19 April 2026, SDSN Western Balkans organized the Economic Forum in Sarajevo, convening over 100 participants from public institutions, academia, the private sector, international partners, media and UNDP. The Forum highlighted sustainable development and energy transition, including the introduction of a major renewable energy investment starting in BiH, with regional scale-up potential across the Western Balkans and broad support from key stakeholders involved.

Audience and media engagement at the Economic Forum BiH 2026. Credits: SDSN Western Balkans / Economic Forum BiH 2026 Organizing Team

The green transition remains one of the most important development priorities for the wider Western Balkans region.

Hosted by:

School of Business and Economics,
University of Sarajevo

SDSN Western Balkans

NETWORK MANAGER

Lamija Čeremida leads stakeholder engagement, policy dialogue, and regional initiatives advancing SDG implementation at SDSN Western Balkans. She has convened high-level discussions bringing together government, academia, and private sector actors, including the Economic Forum of Bosnia and Herzegovina. Her work focuses on integrating sustainability principles into policy frameworks and strengthening multi-stakeholder collaboration across the region.
